Jerry W. Reasner, DMD, a Dentist & Prosthodontist with Reasner Dental

Get to know Dentist & Prosthodontist Dr. Jerry W. Reasner, who serves patients in Birmingham, Alabama.

New York City, Aug 3, 2020 (Issuewire.com**)** - Dr. Reasner is a distinguished dentist and prosthodontist offering dental implants, same-day crowns and veneers, and comprehensive full-mouth reconstructions at Reasner Dental in Birmingham, Alabama. Dedicated to providing high-quality care since 1987, he aims to provide results that benefit health, appearance, and confidence.

Recognized by patients and peers alike for providing excellent care, Dr. Reasner has a strong belief that his patients deserve the best care dentistry has to offer and exhibits this by investing in the latest technology and continuing education. He also surrounds himself with experienced caring staff, treating patients as individuals, and tailoring treatment plans to fit their unique needs.

Academically, he graduated from Andrews University with a Bachelor of Science degree in Biology in 1980. During his tenure there, he was an “Andrews Scholar” - an award voted by students and faculty for academic achievement and leadership. He was also inducted into the distinctive “Who’s Who in American Universities and Colleges”. Ever since early elementary school, Dr. Reasner knew that he wanted to become a dentist and began his journey to achieve his dream at Loma Linda University.

He spent his first two years there and became involved in implant research, representing Loma Linda University at the National Student Research Convention. He then followed his heart and returned home to his fiancé and began studying at the University of Alabama School of Dentistry. After graduation, he continued his training by completing his residency in prosthodontics at the University of Alabama. This included extensive training in crowns/bridges, dentures, partial dentures, implant prosthodontics, and full-mouth reconstruction. He was also a clinical instructor during this time.

In the course of establishing a comprehensive dental practice, Dr. Reasner has done away entirely with metal restorations, instead of using e.max® (an exceptionally strong glass-ceramic), zirconia, and other modern restoration materials that provide durability and aesthetics. He welcomes all new and returning patients to his practice and provides focused and intuitive care in every case.

“Our mission is to generate intuitive solutions to complicated dental cases, promote elegance in the art of dentistry, use advanced technology to promote positive oral health in the long-term, and to provide excellence in dentistry for all patients” according to the mission statement of Reasner Dental.

In order to stay up to date in his field, Dr. Reasner remains a member of several professional dental organizations, including the American Dental Association, the Alabama Dental Association, the American College of Prosthodontists, the Academy of Osseointegration, and the International Congress of Oral Implantologists.

Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries and extractions and perform other duties to ensure that the teeth and mouth are healthy.

Prosthodontics, also known as dental prosthetics or prosthetic dentistry, is the area of dentistry that focuses on dental prostheses. A prosthodontist is a specialist dentist who deals with the replacement of missing teeth and related mouth or jaw structures by bridges, dentures or prostheses.

Happily married for over three decades, Dr. Reasner and his wife have three children.
