

10th Edition of International Conference on Preventive Medicine & Public Health, July 11 -12, 2019

Innovations & Current Trends in the field of Preventive Medicine and Public Health

Lower Austria, Aug 31, 2018 ([IssueWire.com](http://www.IssueWire.com)) - After successful accomplishment of our **[Ninth Edition of International Conference on Preventive Medicine and Public Health](#)** on **July 16-17, 2018** in **London, UK**. We are glad to welcome you at our new destination in **Vienna, Austria** from **July 11-12, 2019** for our upcoming Event on 10th Edition of International Conference on Preventive Medicine and Public Health organized by EuroScicon Pte Ltd. (Preventive Medicine Congress 2019).

Euroscicon is honored to host the **Tenth Edition of International Conference on Preventive Medicine and Public health** taking place on **July 11-12, 2019** in **Vienna, Austria**. The **[ICPM PH 2019](#)** has turned in to a premier forum to network, learn and connect with experts, academicians, researchers, specialists and activists in generating a platform to discuss and spread meaningful messages, values and practices in the subject of Preventive Medicine and Public Health.

The conference is hosted around the theme **["Innovations & Current Trends in the field of Preventive Medicine and Public Health"](#)** with the goal to unite a wide audience of academics, industry, policymakers, and specialists around clearly circumscribed topics, engage participants in the productive level-headed discussion, and facilitate mutual understanding. An additional objective of the Congress is to provide a place for academicians and experts with inter-disciplinary/multi-disciplinary interests associated to Preventive Medicine and Public Health to meet and interact with individuals inside and outside their own specific disciplines.

We are looking forward to welcoming you and spending valuable time in **Vienna, Austria**.

What you'll get:

- Get deep and deeper than ever into Preventive Medicine and Public Healthobstruction with 2 full days of expert keynotes, plenaries, workshops, symposiums and group discussions.

- Develop a plan of action and long-term strategies you can implement in your organization/institutions
- Learn new emerging technologies, the latest trends, and success methodologies around individual genomics, preventive medicine policies, risk management, diagnostics, immunotherapy, analytics, infrastructure and more.
- Network with expert peers, medical leaders and Preventive Medicine specialists, and get the insights you need to move forward for better advancement and development.
- Get access to focused and provocative discussions.
- Engage in an interactive environment on the key issues.

Target Audience:

The conference is open for all the experts working in Preventive Medicine and Public Health which includes but not limited to:

Preventive medicine and Public Healthcare providers, Preventive Medicine and Public Healthcare professionals, Public Healthcare Administrators, Physicians, Business Analysts, Data Analyst, Public Healthcare Consulting firms, Healthcare head seekers, Preventive Medicine and Public Healthcare recruiting agencies, Healthcare Investors, Preventive Medicine and Public Health specialists, Public Health Workers, Preventive Medicine and Public Health Societies /NGO's, Preventive Medicine and Public Organizations, Public Health Professionals, Preventive Medicine and Public Health Economists, Medical Lab Technicians, Community Health Workers, Primary Care Providers, Foundation Leaders, Direct Service Providers, Policymakers, Researchers, Academicians, Advocates Policy Makers and others.
