New York City, Dec 10, 2020 (Issuewire.com**)** - Kim is a certified registered nurse practitioner and a certified family nurse practitioner currently serving patients in Pennsylvania. Known for being responsive with superior follow-through skills using a consultative approach, her areas of expertise include cardiology, palliative care, and addiction recovery.

Since December of 2019, she has been working at Evolutions in Health, LLC in Eau Claire, Pennsylvania. There, she offers affordable comprehensive family medical care, promoting wellness, and acute and chronic disease management expertise for patients and families. She also manages accounts, acquisition, and billing, as well as fosters networking and collaborative relationships in the medical setting and surrounding communities.

Graduating Cum Laude with her Associate of Applied Science in Nursing degree from Butler County Community College in 2002, Kim went on to further her education. She earned her Bachelor of Science in Nursing degree in Case Management from the Slippery Rock University of Pennsylvania in 2005, and her Master of Science in Nursing degree from Carlow University in 2016.

Continuously advancing her professional efforts, she is a member of the Pennsylvania Coalition of Nurse Practitioners, the American Association of Nurse Practitioners, and the American Association of Critical-Care Nurses. She is also certified in Basic Life Support through the American Heart Association, and in Neurocognitive Training through Evaheart, Inc.

As part of cross-functional teams to meet patient needs in demanding environments, Kim has been recognized for delivering high-quality patient care and functioning She has demonstrated success in developing and executing programs to improve productivity, profitability, and effectiveness. She is also an effective written and verbal communicator and conflict resolver, motivating others while remaining acutely aware of individual needs.

A Certified Registered Nurse Practitioner (CRNP) is an advanced practice registered nurse who provides care to pediatric patients, in the realm of primary care. They perform comprehensive and focused physical examinations, diagnose and treat common acute illnesses and injuries, and provide immunizations to ensure well child care. CRNPs can order and interpret diagnostic tests, prescribe medicines and therapies, and perform certain procedures (based on state/national practice guidelines). They can also educate and counsel patients and their families regarding healthy lifestyles, healthcare options, and disease prevention.

A Certified Family Nurse Practitioner (FNP-C) is an advanced practice registered nurse who holds certification and works autonomously or in collaboration with other healthcare professionals, to deliver family-focused care. Given the rather broad nature of the “family” patient population focus, FNPs offer a wide range of healthcare services that revolve around the family unit; from health promotion and disease prevention to direct care and counseling across the lifespan.
