

Bryan Winstanley, Montreal Qc- Winstanleyrims.Com Announces A New Wheel Design

Quebec, Aug 20, 2018 ([IssueWire.com](http://www.IssueWire.com)) - We would like to bring to your attention a new design in the carbon fibre wheelsets available on the market. We wanted to build a superior product that wouldn't crack, delaminate, or falter under braking and the new design delivers on results.

We reinforce your carbon wheels with alloy now for better heat distribution, it allows for better braking, even in the rain, and will not crack. In fact, we guarantee the design against manufacturer defects and cracking for 3 years.

About Company:

Winstanleyrims.com, a Montreal QC based company distribution road bike race wheels around the globe since 2016.

Please visit the new design and learn more about our wheels at:
