

SiberX Launches Canada's First Storm Workshop With EC-Council

Toronto, Aug 27, 2018 ([issuewire.com](http://www.issuewire.com)) - siberX has partnered with EC-Council to launch Canada's first Mobile Security Toolkit Ethical Hacking workshop(Better known as STORM!).

siberX is a roaming, customized platform for training, events, and skills development. They have partnered with EC-Council to provide industry-leading certifications to train and test professionals –

with a team of multi-disciplinary experts, they will run live simulations and war games to recreate threats, scenarios, and responses faced across industries. All siberX programs are provided through in-person, self-paced, and blended formats and will serve multiple industries across Canada.

Offered for the first time in Canada, STORM is a fully-loaded pen-test platform which comes equipped with a customized distro of Kali loaded onto a portable Raspberry Pi-based touchscreen device. The course content was derived by pulling carefully selected modules from EC-Council's Certified Network Defender (CND) and Certified Ethical Hacker (CEH) certification courses.

SiberX and EC-Council are bringing Michael Angelo Vien, one of the most seasoned and sought after Cyber Security experts to deliver this 1-day workshop. Vien has over 24 years of experience in Information Technology including networking, system administration, and development, with a focus on Information Security. As the former Chief Information Security Scientist of WholeSecurity, one of FortuneMagazine's Top 25 Breakout Companies of 2005, Vien was fundamental in creating the patent-pending behavioral technologies that drive the company's endpoint security solutions. Vien has spent a considerable amount of time researching and developing viruses and Trojan horses to aid in his understanding of these types of threats, the result of which has made him a foremost expert in the field of malicious code. Accordingly, his vast experience in the fields of Information Security, Identity Theft, Phishing, and Malicious Code, have led to Vien to being asked to speak frequently on these topics for a variety of public as well as government forums and panels. Vien has also performed consulting services and training for over 35 US government agencies. In addition, Vien has developed and taught various classes on Information Security for a number of Fortune 500 companies and government employees around the world including members of the US military.

The first STORM workshop in Canada will be run by siberX on September 27th, 2018. Participants of the workshop not only receive a one day comprehensive workshop with a reputed instructor but also a fully portable hacking toolkit device, access to the STORM center with labs and instructional resources as well as further discounts to future EC-Council and siberX training.
