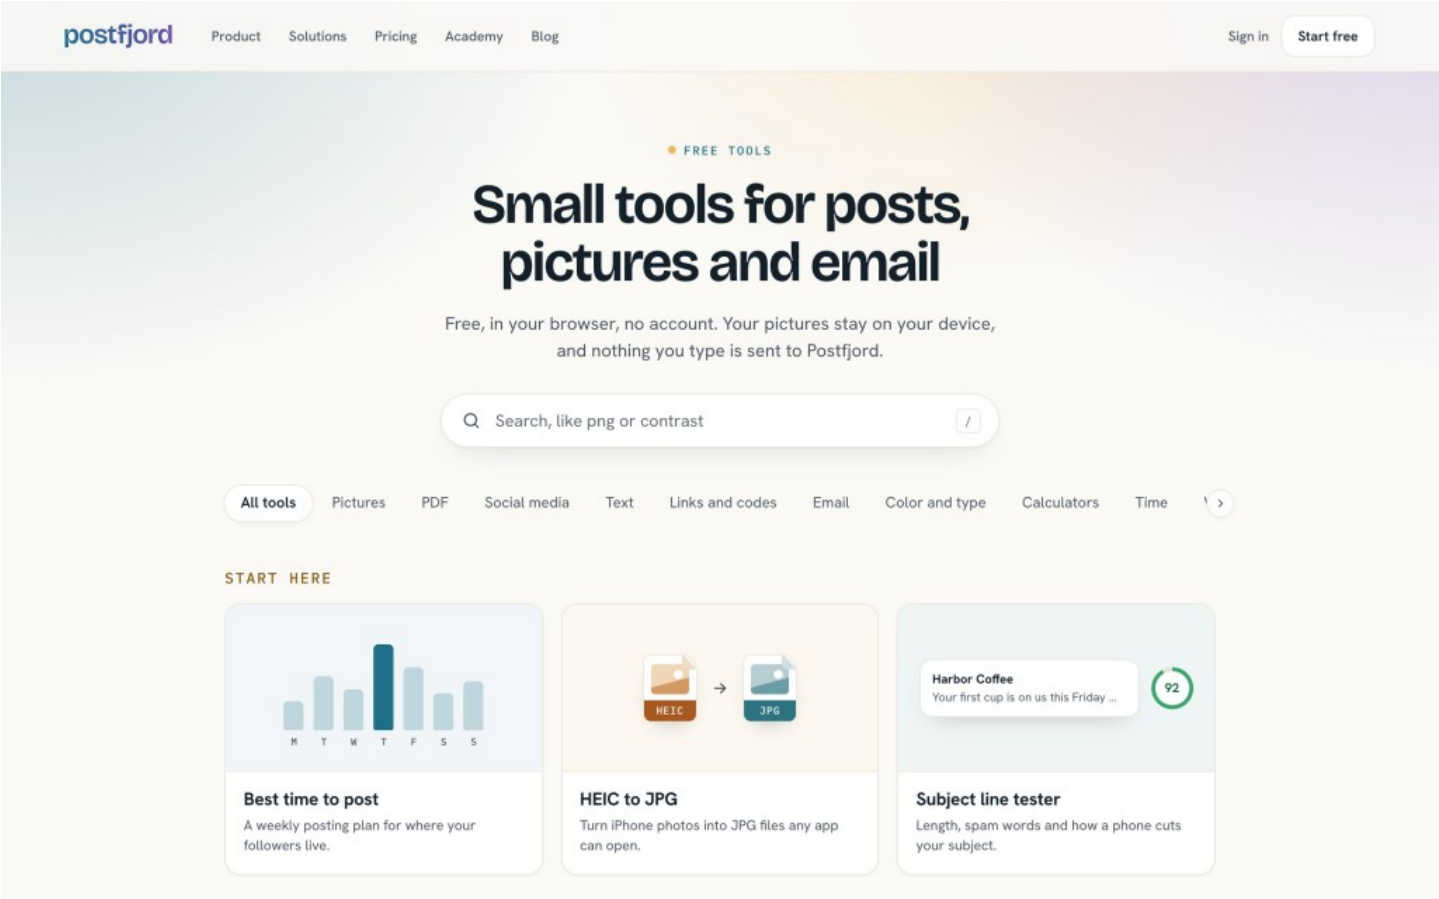
# Postfjord Puts 101 Free Tools Online That Work Without Uploading a Single File

**Merge a PDF, make a QR code, resize a photo or pick a giveaway winner, free and with no account. Every tool runs in the browser, so files never leave the person's own device.**



**Uppsala, Sweden Nov 23, 2026 (Issuewire.com)** - Postfjord, the social media and email marketing app for small businesses, today opened 101 free tools at postfjord.com/tools. They cover the small jobs a business owner runs into every week: turning phone photos into one PDF, shrinking a picture for Instagram, counting the characters in a caption, or making a barcode for a product label.

Most free tools online ask people to upload their files to a server first. Postfjord's tools do the work inside the browser instead. A menu, a contract or a photo of a receipt is never sent anywhere. Once the page has loaded, JPG to PDF even works with the network switched off.

The most used tools include:

- **JPG to PDF:** put photos in one PDF, pick the order and the page size.
- **Merge PDF and Split PDF:** join files or take pages out, with a preview of every page.
- **QR code generator:** codes for links, Wi-Fi and contact cards, in a business's own colors, saved as PNG, SVG or PDF. They never expire.
- **Image resizer:** one photo in the exact size for Instagram, TikTok, YouTube, Pinterest, LinkedIn or X.

- **Word counter:** words, characters and hashtags, with the limit of each social network.
- **Spin the wheel:** a random picker for giveaways, with a draw code anyone can use to check the result.

The rest are grouped by job: PDF, pictures and color, text, links and codes, email, and calculators for things like engagement rate, CPM and A/B tests. Every tool has its own page in English, German, French, Spanish and Portuguese.

"A bakery owner shouldn't have to make an account and upload a price list just to turn it into a PDF," said Nicklas Johansson, co-founder and CEO of Postfjord. "We built these for the small jobs between posts. They're free, they're quick, and the file stays on your device."

The tools are free with no sign-up and no limit on use. People who want to plan and post their content can try Postfjord itself, which has a free plan.

**About Postfjord**

Postfjord is a marketing app for small businesses. It designs posts and videos, schedules them to Instagram, Facebook, TikTok, YouTube, LinkedIn, Pinterest and more, answers the DMs they bring in, and sends newsletters, all in one place. It works with AI apps like ChatGPT and Claude. Postfjord is a product of Yogakollektivet Sverige AB in Uppsala, Sweden, and was founded by Nicklas Johansson and Lizette Pompa.
