

Emsisoft Releases a Completely Redesigned UI

Emsisoft releases major interface update of Emsisoft Anti-Malware

Nelson, Sep 5, 2018 (Issuewire.com) - [Emsisoft](#), a leading provider of premium internet security software, released a major redesign of its flagship product, Emsisoft Anti-Malware.

Leading not only in malware protection technology, Emsisoft is also known for creating beautiful and efficient anti-malware software, and is now once again breaking ground with a major update featuring one of the most advanced UI designs for anti-malware software available in the market. The update introduces a new user interface for improved usability that also dynamically adapts to screen size for optimized readability.

[Emsisoft Anti-Malware](#) is an award-winning internet security solution that uses a combination of behavioural heuristics and dual-engine signature-based detection to completely secure systems from viruses, ransomware, trojans, and phishing and browser attacks with minimal impact on system performance. It also works in conjunction with [Emsisoft Enterprise Console](#) for business use.

"Emsisoft Anti-Malware has protected millions of home and business users worldwide and we take pride in listening to our customers and incorporating their feedback in our products," said Christian Mairoll, Emsisoft CEO. "We are continually looking for ways not only to develop the technology that powers the security that Emsisoft provides, but also to find ways to make the user experience in our

products are intuitive and enjoyable.”

Additional details about the update can be found here [Emsisoft News](#).

About Emsisoft

Emsisoft is a fully-distributed internet security company that develops premium software solutions for home and business users. Committed to providing users with the best malware protection possible, Emsisoft combines a first-class dual-engine scanner with behaviour blocker technology to protect users from all types of internet threats. Emsisoft guarantees superior detection, efficient removal, and a clean Windows operating system without compromising a computer’s performance. The company sets itself apart from others through its fast and personal customer support and prides itself on being one of the only antivirus companies to ensure the privacy of user data.
