

Radar Absorbing Material Market to showcase 18.5% CAGR between 2018-2024

Radar Absorbing Material Market Size is Expected to Grow from USD 324.5 MN in 2017 to USD 1,100.3 MN by 2024, at CAGR of 18.5%

Pune, Sep 29, 2018 ([Issuewire.com](http://www.issuewire.com)) - According to the global [Radar Absorbing Material Market](#) report published by Value Market Research, the market is expected to touch USD 1,100.3 Million by 2024, with a CAGR of 18.5% growing from USD 324.5 Million in 2017.

The report also covers detailed competitive landscape including company profiles of key players operating in the global market. The key players in the radar absorbing material market includes Arc Technologies, Inc., BAE Systems Plc, Cuming Microwave Corporation, Eeonyx, Laird Technologies, Inc., M.S.M. Industries, Inc., Mast Technologies, Micromag, MWT-Materials, Inc., Panashield, Parker Hannifin Corp And Soliani EMC S.R.L. An in-depth view of the competitive outlook includes future capacities, key mergers & acquisitions, financial overview, partnerships, collaborations, new product launches, new product developments and other developments with information in terms of H.Q.

Market Dynamics

Rising demand for stealth aircraft followed by technological advancement for the production of new material to reduce visibility from the radar is driving the market growth. Booming end-use industries such as aerospace, healthcare, automation, electronics and others are likely to augment the market growth in the forecasting period. Additionally, rising governmental investment in the betterment of national defence and security is another trait fueling the market growth. Rising demand for imaging equipment from the healthcare sector is also expected to boost the market growth. Moreover, High demand for unmanned aircraft in commercial, military and civil sectors is fueling the RAM market growth.

This detailed market study is centred on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights into the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of radar absorbing material.

Market Segmentation

The broad radar absorbing material market has been sub-grouped into type, technology, material and end-user. The report studies these subsets with respect to the geographical segmentation. The strategists can gain a detailed insight and devise appropriate strategies to target a specific market. This detail will lead to a focused approach leading to the identification of better opportunities.

By Type

- Magnetic
- Dielectric
- Hybrid

By Technology

Impedance Matching

- Pyramidal Absorbers
- Tapered Loading Absorbers
- Matching Layer Absorbers

Resonant Absorbers

- Jaumann Layers
- Dallenbach Layer
- Salisbury Screen

Circuit Analog RAM

Magnetic RAM

Adaptive RAM

By Material

- Carbon
- Metal and Metal Particle
- Conducting Polymers
- Polypyrrole
- Polyaniline
- Other Conducting Polymer

- Tubules And Filaments
- Chiral Materials
- Shielding

By End-User

- Military
- Communications
- Industrial
- Automation
- Electronics
- Healthcare
- Others

Regional Analysis

Furthermore, the report comprises of the geographical segmentation which mainly focuses on current and forecast demand for radar absorbing material in North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. The report further focuses on demand for individual application segments in all the regions.

About Us:

Value Market Research was established with the vision to ease decision making and empower the strategists by providing them with holistic market information.

We facilitate clients with syndicated research reports and customized research reports on 25+ industries with global as well as regional coverage.
