

## Seedland Leads Smart Life- The Transformation of Chinese Real Estate Industry

**Beijing, Oct 29, 2018 ([Issuewire.com](http://Issuewire.com))** - In the afternoon of October 25, 2018, Beijing Time, the grand opening of Seedland 2018 Media Conference, “Seedland Leads Smart Life” was held in Beijing Jingyuan Art Center. Hundreds of domestic renowned media were invited to the conference. Wu Xiaobo, famous writer on finance and economics and Yuval Harari, global cutting-edge historian showed attendance and addressed keynote speeches.

During the conference, Seedland indicated that it was gradually building SLS (Smart Life System) and making a systematic analysis of China’s future residential life. Some partners shared the practices, explorations and staged results of Seedland in real estate, membership, household, community, and health, etc. Seedland always takes the user demand as the priority by providing full lifecycle smart experience. Different from conventional real estate enterprises, the advancement of Seedland lies in that it has changed the features of real estate. As the first enterprise to implement product supporting services as a project standard, it actually makes people's lives better and more convenient, optimizes the lifestyle and enables people to enjoy a smart life, marching towards a new era with them.

Seedland was founded in Guangzhou in 2006 as a real estate enterprise but aiming for more than that. The 12 years of forging ahead and bold attempt have made it into an industry-enabling platform

company to provide smart life solutions. Seedland mode has not only brought forth a brand-new concept of life, but it will also provide a new sample mode of future Chinese real estate industry for reference.
