

World's first Apple only premium VPN App in iTunes Store

New York, Oct 12, 2018 ([issuewire.com](http://www.issuewire.com)) - Y Combinator backed startup Hot VPN Pro is a premium VPN company exclusive for IOS users. It is a new VPN player in the market and so it provides fresh list of IP. It provides VPN speed upto 150 Megabits/s . Hot VPN Pro provides no log VPN services only at 9.99\$/week which includes pro servers at low cost. The pro app cost only 17.99\$ one time which gives high speed server in USA. lifetime VPN only at 17.99\$, That is so cool. You can unblock any content and apps , can use USA Netflix. That is so cool.

Hot VPN Pro provides 256 encryption to ensure that your internet connection is fully encrypted, nobody can hack your data. Hot VPN Pro did not include any analytical tool in their app unlike 90% other VPN App. Normally free app collects data and sell to third party to make money so that they keep running the business. But making a paid VPN is a tough choice for founders since people do not want to pay for their VPN any more. Since they have raised 500k USD from Venture, they are willing to take this risk. Here is the pros and cons of Hot VPN Pro.

Pros:

1. Very high internet speed with fast connection time

2. Support forum
3. Good number of servers
4. No Log
5. Torrent Allowed

Cons:

1. Ugly UI
2. A bit pricey
