

## Cannabis Coin 420 ERRL Coin the answer to Cannabis retail

**Vancouver, Nov 17, 2018 (IssueWire.com)** - 420 ERRL Coin (ERRL) announces today, November 17, 2018, from Vancouver, Canada, that Canadian recreational cannabis sales have been buoyant, and that the limited number of retail outlets have sold out supply. It has been reported widely that the cannabis supply from legal cannabis producers is very limited as many of the official Canadian Provincial government agencies have required large volumes of supply that have been distributed to cannabis users via online sales or direct counter sales. The true cannabis coin, 420 ERRL Coin will also be contacting USA based cannabis retailers especially in Massachusetts, where retail cannabis sales being November 20, 2018.

Positioned to be the true cannabis coin, 420 ERRL Coin is currently on ICO, the symbol being ERRL, thru Ethereum platform. Visit etherscan.io to view the 420 ERRL COIN, the ICO address is 0x1bB0A576936Bce5d983e676073aC48ba49f12e05 .

The cannabis coin ICO is for up to \$120 million Canadian equivalents, with the 420 ERRL Coin to be used in select retail locations and the system to then be sold to other retail outlets in Canada and the USA for use. Several states have approved medical cannabis and Massachusetts announced cannabis outlets will open on Tuesday, November 20, 2018, for retail sales. Check the short video at

The cannabis coin, 420 ERRL coin offers anonymity to the cannabis clients and allows the cash proceeds to be delivered to banks. The 420 ERRL Coin when trading on exchanges, will rapidly appreciate in value, as outlets convert the cash brought to retail outlets to the 420 ERRL Coin and the conversion to the 420 ERRL Coin will allow the retailers to deposit the cash with banks due to the fact the cash proceeds are from the exchange of the cash to 420 ERRL Coin, not from cannabis sales.

Invest in your future, with the 420 ERRL Coin ICO, the true real useable cannabis coin. The 420 ERRL Coin will appreciate rapidly once listed, however ,the price of the cannabis while still quoted in the cash currency never changes, only the amount of 420 ERRL Coin that you use to purchase will be of a smaller equivalent.

At the moment the ICO the price of one ERRL is equivalent to \$0.00032. Marino Specogna, one of the founder's mentioned, "My nephew, who was 10 at the time, mentioned to me a few years ago that he had purchased Bitcoin. When I asked him how much he purchased, he mentioned he had purchased Canadian equivalent \$0.50 of Bitcoin. I laughed and asked if he had sold it yet, and his reply was a terse "no, not for 50 years!". When I heard that last statement, it made me realize, our youth are actually quite savvy with their money and understand the value of cryptocurrencies and limited supply and fiat currency issues. This short conversation with my nephew helped me to focus on the idea of cryptocurrency with lasting value and growth potential. That led me to conceive the idea of this true cannabis coin that can be used at all cannabis retailers since it will be used initially at select cannabis retailers once the ICO is complete. With many of our founders having extreme stock market making and trading experience the past 30 years, we envision a rapid value increase of the cannabis coin, 420 ERRL, once it is quoted on an exchange."

The true cannabis coin, 420 ERRL will be used in retail to offset the general populations perceived angst at their name's floating around after purchasing at cannabis retailers, then travelling the world and having the fear of some retribution while travelling in those countries that still outlaw cannabis.

Additionally, this true cannabis coin allows the retailers to convert the cash brought into the retail cannabis outlet to convert to the cannabis coin, then the cash proceeds when deposited in the banking system will not be from cannabis sales but token conversion to the cannabis coin, the 420 ERRL coin. With the huge number of coins to be issued, and the stock market techniques garnered by several of the founders with over 30 years experience in regulated stock markets, this true cannabis coin could rise to multi dollar values and even higher over the next 50 years with more cannabis use legislation introduced in USA and other countries of the world.
