

Ensunet Makes It Easier For Enterprises To Find Their Ideal M&A Technology Partner

All-New Ensunet Website Showcases Company's Expertise in Post-Merger Integration

ENSUNET[®]
TECHNOLOGY GROUP

San Diego, Nov 7, 2018 (Issuewire.com) - Ensunet Technology Group, a provider of world-class enterprise IT solutions grounded in positive business impact, is pleased to unveil its all-new website, www.ensunet.com. The new site allows for faster, easier viewing on any desktop or mobile device; importantly, it showcases Ensunet's prowess as an "on-call tiger team" for IT integration in the mission-critical world of mergers and acquisitions or M&A.

"The M&A world is accelerating rapidly, and acquirers and their financial advisors need a trusted resource to ensure the preservation and maximization of value when one company buys another," said Paul Robinson, Ensunet Founder and CEO. "This is our speciality at Ensunet: we've been entrusted by Fortune 1000 enterprises with over \$4 billion in merger-and-acquisition IT support. That's why it's the focus of our all-new website."

The new site makes it easy for visitors to select among three principal areas of the site: for M&A acquirers seeking post-merger integration (PMI) support for IT; for M&A advisors, such as investment bankers, who need either PMI or pre-merger due diligence; and those in the private or government sector who need world-class enterprise IT services.

The site offers numerous exciting upgrades. For example, visitors can download an informative Pre/Post-Merger IT Integration Checklist—for free. There are case studies which showcase Ensunet's experience and expertise. There is new functionality for contacting Ensunet, including the ability to calendar a no-obligation initial consultation directly from the site. New material—in the form of new case studies, social-media updates and job postings for example—is being continually added.

The new website, at www.ensunet.com, is available for visits immediately.

About Ensunet

San Diego-based Ensunet Technology Group is a premier provider of vendor-agnostic enterprise IT services, specializing in post-merger IT integration that delivers positive operational, performance, and financial business impact. As an elite and agile "on-call tiger team," Ensunet has been entrusted with

over \$4 billion in global IT merger-and-acquisition support by Fortune 1000 enterprises. Ensunet is an 8(a) qualified and SBA-certified small business; in 2018, the company was ranked Number 335 on *Inc.* Magazine's 5,000 fastest-growing private companies in America—and among its top ten for IT management companies.
