

TerraMaster Launches Upgraded F4-220 Cloud Storage Device with TOS4.0 System

London, Nov 21, 2018 (Issuewire.com) - Tech giant TerraMaster has been making some of the smartest devices for a long time. They have been specializing in professional and private cloud storage devices which are known for their impeccable performance.

TerraMaster has recently launched an upgraded F4-220 cloud network storage device which comes with Intel dual-core 2.4GHz CPU and has a 2GB of RAM. The device is equipped with the latest TOS4.0 system. The overall design is spot on, and the performance is also perfect.

The F4-220 NAS from TerraMaster supports Seagate IHM and comes with a powerful hardware configuration that includes an AES hardware encryption engine to encrypt shared folders and network data transmission in order to keep data from unauthorized access. Fitted with an advanced Btrfs files system, it offers 8,192 systemwide snapshots and 512 snapshots per shared folder.

The real-time hardware transcoding supports H.264 4K video streaming while an aluminum-alloy shell and intelligent temperature control ultra-quiet fan allow for excellent heat dissipation. The company also recommends using this product with the Seagate's IronWolfNAS HDD for best compatibility.

Each of their products is known for their superior versatility and robust quality with many experts believing that that company has a bright future ahead of them. Those who would like to explore more

about this brilliant product by TerraMaster or even the ones who are looking to place their order should make it a point to visit <https://www.amazon.co.uk/dp/B01G1YI0NC>

Check out with the coupon code: R7HNDPKC, get £80 off from Black Friday to Cyber Monday. (For F4-220 model)
