

Aitca Platform Launching Cannabis Services

Sao Paulo, Dec 11, 2018 ([issuewire.com](http://www.issuewire.com)) - AITCA Platform announced today that it will be launching a marijuana service using AITCA's private blockchain platform. Licensed Marijuana growers and wholesalers will be able to register and perform instant transactions globally. The registration process will be straightforward and once registered, users can connect with others in the industry.

AITCA private blockchain has several advantages for those in the cannabis industry, including privacy, flexibility and real-time transaction information including shipping updates. AITCA platform is FREE for all users and has no transaction fees.

AITCA will also deploy a custom artificial intelligence solution that will assist those clients using the platform to connect with new potential clients and find the best Marijuana products for their customers. It will perform this by studying customer/supplier habits and using the optional feedback users will be able to leave.
