Los Angeles, Dec 13, 2018 (Issuewire.com) - QY Research has lately published a new report on "Global Floor Grinding Machine Market: Industrial Chain Market Insights, Growth Trends and Competitive Analysis 2025," for the forecasted period 8-years, i.e. between 2017 and 2025.

Floor grinding machine, or floor grinder, is a purpose-built machine that is used for grinding and polishing marble, granite, concrete and any other kind of floor. Machines that grind concrete floors are usually made to handle much more stress and will have more power to drive the unit as concrete has a much higher sliding friction than marble or granite which is also worked wet, therefore with less friction. In fact, some types of marble will spark when it is ground dry, causing deep damage to the marble surface.

For industry structure analysis, the [Floor Grinding Machine industry](#) is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 24 % of the revenue market. Regionally, North America is the biggest production value area, also the leader in the whole Floor Grinding Machine industry.

China occupied 31.05% of the production market in 2016. It is followed by North America and Europe, which respectively account for around 29.74% and 23.38% of the global total industry. Other countries

have a smaller amount of production. Geographically, North America was the largest consumption market in the world, which took about 27.26% of the global consumption volume in 2016.

For price trend analysis, a key variable in the performance of Floor Grinding Machine producers is raw material costs, specifically the speed at which any increase can be passed through to customers.
