

Qualyon Launches Outbounder the AI Virtual Agent Platform

Qualyon Outbounder is a Virtual Agent that can Call & Engage in a Conversation!

Bengaluru, Dec 15, 2018 (Issuewire.com) - Qualyon Cognitive Intelligence Pvt. Ltd, a Bengaluru based Promising StartUp has recently launched the AI enabled Virtual Agent platform.

Qualyon Outbounder is a Virtual Agent that can call someone and have a conversation just like a Siri or Google Virtual Assistant. It's an AI platform that can make interactive outbound business calls and campaigns that can not only reduce your operations cost but also increase your business ROIs.

Definite solution to regular business follow-ups, feedbacks, reviews, payment recoveries, contract renewals, Onboarding welcomes emergency announcements, important reminders & invitation RSVPs etc.

Let QUALYON Virtual Agents do all the TALKING!!

- ☐ Customer Qualifier
- ☐ Payment Collector
- ☐ Mass Campaigner
- ☐ Surveys/Feedback
- ☐ Urgent Notifications

Qualyon is the IT product and services providing company having expertise in the Artificial Intelligence and cognitive technologies with a focus on designing and developing intelligent virtual agents. Qualyon uses state of the art, in-house developed Qualyon Assets to offer tailor-made conversational applications. The platforms have been developed using proprietary algorithms to improve the conversational experience of users allowing a far more natural conversation than any other virtual agents in the market.

Qualyon has been getting applauding response from many of the Banks, Contact centers and remittance companies.

Reach out to Qualyon team for detailed information on this platform...
