

Safety Circle India, a leading health and safety company, launched fresh look of their website

Chandigarh, Dec 19, 2018 ([Issuewire.com](http://www.Issuewire.com)) - Safety Circle India Pvt. Ltd., a leading provider of [Health & Safety Training, Consultancy, and Audits](http://www.safetycircleindia.com) to various industries & sectors in public & private segment, announced today the launch of its newly designed website at www.safetycircleindia.com. With a brand new look, The website attributes a modernized and simplified design, enhanced functionality and enriched content areas to liven-up the concept of Health & Safety.

The opening of the website speaks all about the safety of our community & our people. As the company has worked with Forbes 500 companies, the revamped website showcases the global perspective by mentioning the legacy of 14 years in the Industry and also, that under Safety Circle India, over 1million people have been trained till date.

Moving from conventional training and audits, the company has always set the benchmark by creating their own rules, strategies & also, by introducing newer concepts. For Instance, for the last 5 years, [Health & Safety consultancy](#) team works on the communication and branding aspect for the client to make it more attractive and easy-to-understand by common people.

Safety Circle started their operations when safety was least important to us or to any corporate. They have provided health & safety industry with a formal vocabulary and terminology, that brought everyone on the common platform. Continuing with their work, Safety Circle India has initiated their own blog now. The website features blogs not only in article format but also, has animated videos playing some usual incidents and how a small mistake costs peoples' lives. In addition to this, the legal team has started uploading court judgments like Good Samaritan Law, safety rulebook for corporates and traffic rules for our own reference.

Delivering a fully responsive experience, the new website gives users a seamless transition from desktop to mobile browsing, and intelligently pulls the latest content from the new blog space for users to access quickly and easily.
