

Specialists in Magnetic Badges and Magnets

London, Dec 20, 2018 ([Issuewire.com](http://www.Issuewire.com)) - BadgeMags is a popular name in the international badge and magnet market. The company is well-known for making quality products at the most competitive prices. Keeping in mind the growing demand for high-quality badges and magnets, BadgeMags has decided to spread its wings. The company is now present in the United Kingdom. With more than 15 years' experience in manufacturing top-quality badge magnets as well as magnets, BadgeMags needs no introduction!

Specialists in:

Badge Magnets:

[BadgeMags](#) supply individual magnets which are well encased in a metal pressing and then supplied with a zinc-plated face-disc. Users can purchase small, medium and large size magnets from the website. Some of the most popular products offered by BadgeMags include DM Plastic and DM Metal type of badge magnets. These are just perfect for use in tie-pins and label badges. The company has an extensive range of badge magnet designs. They offer customizable solutions to meet the requirements of the users.

Magnets:

BadgeMags supplies high-quality magnets which are made from barium or iron oxide or strontium

carbonate. Flexible magnets are supplied by the company in sheets and also flat strips. These usually differ from the injection molded magnets which are easily available.

Popular Kinds of Magnets offered by the Company Include:

- **DM Metal:** This is an individual magnet which is encased into a convenient metal pressing which is supplied along with a zinc-plated face disc. This disc is well engrossed on a side which helps in secure positioning. Just on its other side, there is a self-adhesive foam which can be pre-applied. For the purpose of easy removal, you can use the die-cut tab.
- **DM Plastic:** This is an individual magnet which is well encased in a round plastic moulding. It is available with a zinc-plated face disc. This face disc is present on a side which helps in securing positioning. On the other side, there is a self-adhesive foam which is pressure sensitive as well. There is a liner which includes a die-cut tab. It helps in easy removal.
- **SM:** This is the smallest dual powered magnet which is available with two magnets. These are well encased in plastic moulding. These are available with zinc-plated faceplates. There is a liner as well which helps in the easy removal of it, when in use.
