

Advanced Solutions releases “Save Time/Money” Modules at Acumatica Summit

San Diego, Jan 21, 2019 (IssueWire.com) - Advanced Solutions and Consulting, Co (ASC), will be participating in the Acumatica Summit 2018 in Nashville, Tennessee from January 28 through February 2nd. ASC President, Jim Carroll, will be honored with the Acumatica MVP Award for the second consecutive year. The award will be presented by Acumatica CEO Jon Roskill at the Summit.

Acumatica Summit is a yearly event, organized to facilitate collaboration between partners and customers to accelerate cloud-based business success. Participants learn about the latest in Acumatica products and services and also receive product certifications. This is followed by a Summit training, educating the Acumatica community on the optimal utilization of the company's flagship ERP platform and other solutions. 2018 marks a special year as Acumatica turns 10!

This year is equally exciting for ASC as it gears up to present a unique range of Acumatica value-added plug-ins aimed at enhancing productivity for Acumatica users. Savings in terms of money and time are the key value-propositions. Written in the Acumatica xRP platform, these plug-ins will be demonstrated at the Summit with a view to collaborating with the VAR community, working towards a common goal of customer success.

ASC will demonstrate the following solutions for Acumatica Distribution, eCommerce and Financial applications:

- **Time & Transit.** Appending Acumatica's integrated freight functionality, This ASC solution compares both rates and (actual vs posted) transit times from multiple carriers *in real time*. It chooses the least cost method that satisfies the delivery promise made to the end customer. The distributor realizes a maximum profit on freight services.
- **2. Third Party Warehouse API:** This add-on seamlessly integrates third-party warehouses (3PLs) with Acumatica ERP; i.e. 3rd party warehouses interact as an Acumatica warehouse. Sophisticated web services direct orders to the correct warehouse, maintain inventory count, confirm ship method/carrier and update both tracking information and accounting. The key benefit is “hands-free” book-to-bill operations via ERP controls making virtual distribution a reality.
- **Tax Jar Interface:** This solution automatically integrates the Tax Jar database with Acumatica Sales and Invoices. ECommerce is supported. Tax Jar provides the most competitive pricing for capturing sales tax rates reducing fees paid by Distributors for the necessary service.
- **Dual Serial Number:** This add-on augments Acumatica serialized inventory with a second serial number for every item. Internal, Acumatica generated serial numbers are automatically matched with Manufacturer Serial Numbers via scanning. Provides maximum controls for dropships, warehousing and especially returns providing Distributors “double entry” visibility to items throughout their lifecycle.
- **Auto Credit Card Reconciliation:** This solution tracks customer credit card transactions within Acumatica and provides means to *automatically* reconcile with related bank deposits. Dramatically reduces the man-hour required to settle and reconcile credit card related orders, especially those sourced from websites that support Amazon, PayPal, multiple credit card processors, etc.
- **Light Manufacturing:** This add-on creates BOMs and works orders for Acumatica to complete processes related to light assembly. Distributors can save money and manage product

complexities and cost roll-ups within Acumatica ERP (where the Manufacturing Edition is overkill). This solution automatically creates purchase orders for raw material replenishment.

About Advanced Solutions and Consulting, Co. (ASC)

Based in San Diego, [Advanced Solutions and Consulting, Co. \(ASC\)](#) has been in business since 1998 providing leading edge ERP solutions to the mid-market. ASC offers a wide range of services from business process reengineering and custom development to on-time ERP implementation and ongoing support.
