

## Barstable Medical Clinic Offers Safe and Effective Botox Treatments

**Wickford, Jan 22, 2019 ([IssueWire.com](http://IssueWire.com))** - Barstable Medical Clinic ([barstable.co.uk](http://barstable.co.uk)), one of the leading experts in cosmetic procedures, continues to help everyone have a line-free appearance through their highly-effective [Botox Essex](#) based treatments. By availing these, patients can expect positive results in no time at all.

The popularity of Botox treatments has been noticeable for a long time and this is because it's considered an effective way to dramatically reduce fine lines and wrinkles. This is one of the reasons why more and more people are seeking help from Barstable Medical Clinic and their experienced team. They are well aware of the proper and safe procedures in administering Botox injections and so all patients can be sure that their comfort and well-being won't be compromised during the treatments. According to them, "Our experienced team will do a thorough assessment of your facial muscular structure and the extent of lines requiring treatment and formulate an individual treatment plan for you, which will ensure unique and expert results".

To all interested parties, the experts from this clinic remind that administering Botox is not simple. The needs and individual anatomy of each patient must be considered in order to provide the best, long-lasting results. In connection to this, Barstable Medical Clinic offers a free consultation to clients who want all of their questions about the treatment answered. This also offers a great opportunity to discuss the different aspects of Botox and everything that involves in the procedure.

To further discuss the treatment, very small amounts of Botox will be injected using fine needles, resulting in minimal pain. Local anaesthesia and sedation won't be required but patients can expect itchiness over the treated area. It will take to 2 - 3 days to see the initial effect and the results usually last for 4 - 6 months.

However, please be reminded that not everyone is suitable to get Botox injections. Barstable Medical Clinic believes that it's best not to get the treatment if someone is pregnant or breastfeeding. Those who have a history of the neuromuscular disease or are allergic to Botox, should not get the medicine as well.

For more information about this clinic, how their team works and the range of treatments they have on offer, kindly visit their website at [barstable.co.uk](http://barstable.co.uk).
