

# Handcrafted Raw Stone Jewelry for the self made women of today

Minimalistic and Contemporary Raw Stone Jewelry set in solid Sterling Silver

**Bengaluru, Jan 27, 2019 ([Issuewire.com](http://Issuewire.com)) - HANDCRAFTED, RAW GEMSTONE JEWELLERY**

Handcrafted Raw Stone Jewellery by Raw Carat is the brainchild of two filmmakers, Reshma Ghosh and Arun Rabindranath. Raw Carat is an ode to the rough-hewn, rugged beauty of mother nature. The mission was to celebrate natural, organic, raw gemstones. These stones are born deep within the Earth's core and formed over millions of years by unimaginable pressure and intense heat triggered by natural cataclysms. Some even formed in space by interplanetary collisions and brought to earth through meteorites! At Raw Carat, their perfect imperfections, inclusions, natural fissures and sparkle are presented just as nature intended them to be – *raw, rough, bold and beautiful*.

These unusual gemstones come from all corners of the world – from the foothills of Mount Kilimanjaro in Africa, from the Herkimer County of New York and from the remote mountains of Eastern Siberia! Each stone is handpicked for its brilliant colour, shape and luminescence. It is then carefully handcrafted by skilled artisans into jewellery using solid 925 sterling silver, which is nickel free, hypo-allergenic and anti-tarnish plated. Through its contemporary designs, Raw Carat aims to bring a wide selection of precious and semi-precious gemstones to the Indian and global market in the form of wearable art. Because each gemstone is different in shape, size and colour, every piece of Raw Carat jewellery is unique and one-of-a-kind.
