

Major Safety Milestone Accomplished

Jacksonville, Jan 16, 2019 (Issuewire.com) - Engineered Lining Systems crew archives 2000 workday goal with zero lost time incidents

On December 31st, 2018, the Engineered Lining Systems large diameter UV- cure crew reached the admirable milestone of working 2000 days with no injuries. The crew has been involved in some of the most demanding installations of glass reinforced plastic (GRP) liners for a storm and sanitary sewer systems in the United States.

"We are all very proud of the achievements of this crew! They are able to pull together as a team and remain focused on safety while producing world-class products for fortune 500 clients." Don Arch, President

The Engineered Lining Systems construction crews have safely brought trenchless technology solutions to every state throughout the Southeast and many beyond. Through constant training and reinforcement of a 100% safety culture, ELS is looking forward to reaching even more milestones.

Engineered Lining Systems is a highly experienced provider of modern trenchless technology construction with a focus on efficient ultra-violet curing systems. We work attentively with stakeholders to utilize modern, the field has proven, cost-effective solutions for aging conveyance infrastructure rehabilitation. Our smaller construction footprint minimizes site impact, increases production and lowers associated risk all while maximizing workers safety.
