

Neelkanth Power Solutions - Noted Distribution Transformer Manufacturers In Mumbai, India

Neelkanth Power Solutions

Mumbai, Jan 21, 2019 (Issuewire.com) - NEELKANTH POWER SOLUTIONS is established by Mr. Hemant Mehta, the founder partner of Neel group of companies including Neel Controls Since the year 1979.

Neelkanth Power Solutions is engaged in providing products and customized solutions to assess power quality disturbances transformers & ultra isolation transformer. Today, we are among the noted distribution transformer manufacturers in Mumbai, India. Our offered solutions ensure reliability, efficiency, and productivity for your operation. .

As the most reliable name among **Distribution Transformer Manufacturers in Mumbai** India, we offer the best solution for all power quality issues. Our years of designing expertise enable us to deliver customized solutions to our clients. Moreover, with advanced R&D and test facilities and world-class quality assurance system, we offer top-of-the-line products to market on budget & on-time.

Continuous improvements and design innovations help us cater to diverse industries, such as CNC Machinery, Petrochemicals, Steel, Printing, Pharmaceuticals, Robotics, Telecommunications, Process Industries, Textiles, Power Distribution, Railways & many more. Today, we share a huge market place

as the eminent distribution transformer manufacturers from Mumbai.

Servo Controlled Voltage Stabilizer

The Servo Controlled Voltage Stabilizer make an effective solution to fix voltage fluctuation problems. They are designed to maintain a specified output voltage waveform which is completely distortion free and is unaffected by the load power factor. Voltage stabilizer provides high voltage protection. Offering high quality and power performance products we have earned a significant market position as the most reliable and trusted [Servo Controlled Voltage Stabilizer](#) Manufacturers.

UPS Systems

Today, we have become the prime choice for UPS systems manufacturer in India. Our vast domain knowledge and experience enable us to offer robust power protection [ups systems solutions](#) for home and medium to large data centers or buildings. We provide our customers with fully tested and customized solutions at market leading prices.

Furnace Transformers

Our company since 1979 is engaged in providing a quality range of furnace transformers to customers. Consistent efforts of our professional team in this field have made us lead the domestic market as a professional [furnace transformer](#) manufacturer. The high-performance range of product we are offering makes a cost-effective tool for numerous steelworks.

Our Strengths

- One source solutions for all Power Quality issues.
- Proven technology for three decades.
- Designing expertise to provide customized solutions.
- Advanced R & D and test facilities.
- World class quality assurance and management systems.
- Well trained staff and workforce.
- Nationwide pre sales and post sales support.

Our Objectives

- To provide world-class products to market on-time, on a budget, and on quality.
- Continuous improvements.
- Design Innovations
