

New Release! Clean your DPF's without Heat DIY CobraCleanUSA – ECOFuelMax

Clean Diesel Particulate Filters in house for 75% less without damaging heat. Thousands have learned about CobraCleanUSA and are successfully using an easy to us Low Cost solution to cleaning DPF's without damage.

Miami, Jan 16, 2019 (Issuewire.com) - Vehicles that do a lot of stops and go driving or idling experience more Forced REGEN Cycles. Ambulances-EMS, Coach Buses, School Buses, Sanitation, Heavy Equipment, and Delivery Trucks require the most maintenance. All diesel motors since 2007 go

into Forced REGEN Cycles to help keep filters clean. Forced REGEN Cycles to burn/waste 8-10 gallons of fuel every REGEN cycle. Reducing REGEN Cycles can help reduce fuel consumption.

Since 2007, the primary way to clean a Diesel Particulate Filter was to clean it using a Kiln/Oven at 1,800 degrees. The cost to clean a DPF ranges from \$350 to over \$500 per filter. The problems that go along with cleaning a DPF using heat, is damage. After a few cleanings in a majority of cases the filter may need to be replaced due to the ceramic filter cracking from excessive heat. The cost to replace a DPF Filter is \$2,500+. Reducing DPF maintenance can save a diesel owner thousands of dollars annually, keep your vehicles on the road, not in the shop.

Cobra Clean as a DPF cleaner was discovered by accident. It was used for many years to clean the exterior metal shells/body of commercial aircraft. Without heat, it melts Carbon Particulates or the Soot that gets trapped in a Diesel Particulate Filter (DPF). The cleaning process is easy; remove the filter submerged it in CobraCleanUSA for 24 hours. Remove it, rinse, dry and reinstall, you're back on the road.

Using a Biodegradable solution will NOT damage a DPF filter. To date, filters have been cleaned multiple times over the last five years and still come clean without any damage. The cost to clean a DPF with Cobra Clean is \$85.00, 75% less than burning it. The CobraCleanUSA cleaner can clean EGR Valves-Coolers as well as faded oxidized paint.

Go online CobraCleanUSA and see the latest video. Anyone interested in information can call or email us. GO GREEN – Burn Clean!

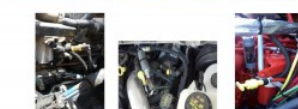

**Reduce Pollution
Diesel Maintenance &
Downtime - Guaranteed!**

ECO Fuel Systems, LLC

Reduce your Re-Gen Headaches (40%-70%)!

If your fleet has a lot of idle Time or Stop and Go performance, Re-Gen's can be a major problem due to excess Particulate from the Exhaust.

ECO-Systems will reduce your downtime with Re-Gen's and keep your equipment on the Road!

KEEP YOUR VEHICLES ON THE ROAD, NOT IN THE SHOP!

Tired of Dealing with REGEN's?
Would You Spend \$390 to Save Thousands/yr?

Reduce Diesel Regeneration Cycles 40% to 70%+
Reduce DPF Maintenance and Down Time Save \$\$
Go **GREEN!** - Reduce Your Carbon Footprint 40% - 70%+

NO CHEMICALS • NO MAINTENANCE

Works by Increasing Reid Vapor Pressure makes fuel burn cleaner
Less Pollution - Less Maintenance - Better MPG

Works On All Fuels and Motors
Buses, Trucks, Fire and more.

Easy to install • Life 20+ Years • No Warranty Issues
90 Day Money Back GUARANTEE - No Risk!
Successfully Installed on +/-100,000 Motors Since 1999
