

To Become A Certified Drone Pilot Prepare Online Remote Pilot Training Course!

Alabaster, Jan 14, 2019 (Issuewire.com) - At **Remote Pilot 101** we are offering the best test preparation courses to individuals who are seeking for the remote pilot certification to fly a drone for commercial purposes. We are assisting folks for passing the aeronautical knowledge test through our online training courses. If you want to become a certified drone pilot, then you have to pass the [FAA part 107 test](#) to obtain the remote pilot certificate so you can consult us to receive your online prep course right now and get training in your home comfort by our expert instructors through video tutorials and be prepared for qualifying the exam.

We are the certified training course providers by the Federal Aviation Administration and serving individuals and companies to obtain certification for Small Unmanned Aircraft System operation. We are offering the complete course + recurrent course for the entire lifespan in just 149 dollars so you can purchase the course at very affordable prices to obtain your remote pilot certificate. For buying the test prep course, you can visit our official website and buy it through the online payment system.

Our training course includes everything that you need to learn for passing the test. It covers the basic knowledge modules which contain information regarding eligibility for enrolling in the part 107 test,

definitions of the unmanned aircraft system, safety regulations, night operations, weight of the drone, and rules for speed, etc. You will find the information through the video tutorial by our well qualified and expert trainers.

In our online training course you will also get to know about the advanced concepts relating to the course such as airspace, operation and safe landing in the adverse weather conditions, loading and performance of the unmanned aircraft, crew resource management, field operations, radio communication system, emergency procedures, and maintenance of flight before operation, and final exam preparation. You will get detailed stepwise information about different lessons for drone operation through the video tutorials.

Through our online test preparation course, you will also get instant knowledge about the exact questions that you have to solve during the final exam to qualify for the remote pilot certification. Our online training course will not only help you to prepare for the test but also assist you in preparing for the renewal of the remote pilot certification for every two years. You can take the recurrent course to renew the certification for the remote pilot from FAA.
