

Youngraceful Announces the Release of Their Pre-bonded Hair Extensions

Youngraceful now manufactures the traditional pre-bonded hair extensions for their customers.

Xuchang, Jan 30, 2019 (Issuewire.com) - Henan, China - [Hair extensions](#) are one of the newest trends today. Youngraceful, a professional manufacturer of various types of hair extensions, now offers pre-bonded hair extensions. This type of hair extensions is also known as the fusion-bonded hair extensions. They are one of the most popular available on the market. Even though they are one of the traditional types, many hair technicians still recommend them.

Youngraceful understands how hectic women's schedules can be and can't always attend to their hair, so they offer the following features for their pre-bonded hair extensions:

- They don't require maintenance as others do. This means that clients don't have to think about maintenance costs. However, if they become worn out, the client will arrange a top-up appointment with their technicians.
- Pre-bonded hair extensions will improve volume and length to the client's hair.
- These hair extensions will last between four to six months with proper aftercare.
- They can be customized to suit and enhance the client's hair. The individual strands can be a mix of colors so they can be used for highlights.

"We understand that women are very particular with their hair. This is why we provide them with semi-permanent hair extensions that don't require high maintenance. We want to promote convenience, which is why the hair extensions for created in the first place." Lily Li, responsible for Youngraceful's professional sales, shares.

The company recommends clients to pay attention to the following when using pre-bonded hair extensions:

- Keratin isn't indestructible, so heat and hair products must be lightly used with this bond. Heat can easily melt the bond and cause them to fall out. With that said, clients must be careful when using hair straighteners to prevent any damage. Also, hair products, such as conditioners, can break down keratin. Clients must only apply conditioners to the mid and bottom sections of the hair to prevent lubrication and damage of the bonds.
- Since pre-bonded hair extensions are only applicable for single-use, clients must be careful when brushing their hair.

- The removal of this type of hair extension is different from the others. It will require the use of acetone to breakdown the keratin bonds.
