

Alternative Pop Rock Band Missyou is Offering Chronic Musical Pomp with their New Song 'Anything'

New York City-based quartet Missyou has some of the best contemporary urban flavors of alternative pop and rock arrangements to offer with their new song 'Anything'.

New York City, Feb 21, 2019 (Issuewire.com) - Apart from the distinctive categorization of musical genres, there are many lateral soundscapes that have made considerable progress in the collective growth of musical norms. An alternative take on pop and rock territories is being extensively assembled that has produced some incredible tracks of our times. **Missyou** is a band treading the same path of constructive alteration of traditional rock and pop. Their newly released single '**Anything**' is an impactful version of reshaped rock with undulating riffs, powerful drum beats, and an emotionally exhilarating lyrical flow. Their sound comprises some of the most sought after sound arrangements put together in organized mayhem. Musically and intellectually enriched, they are creating some of the most compelling thematic concoctions of our times....

Missyou tributes their sound landscape to multiple influences including visual art and filmography. As musicians, their distant objective with their songs is to tell a story of subjective perceptions. From having extensively toured across the USA to releasing regional hits like 'YourBody' and 'Child 44', they are the neo-wavecreators of performing arts in every sense of the word. With '[Anything](#)' and its steady rise in various charts across the country, they are rapidly growing a solid fan base on the global front line. Pop has never sounded so versatile before **Missyou** took on the dire responsibility to create a parallel spectrum of a known genre.

The band is based out of New York City and describes their sound as an obscurity of differential

emotional and social sagas, of yore and today. There are many artists who get lost with their objectives as musicians through visual extravaganza. But this band is exemplifying their vision with ideals and moral values in the spectrum of musical glory. In the end, their effective etymology of lyrical progression and structure of sound are profoundly intertwined to create music at its best. '**Anything**' defines the **Missyou** as four lads of heightened conceptions and ability to adapt to what the present audience stream wants. If you are someone looking to try out alternative pop and rock entrails with an inexplicable sound of the good kind, follow their work on [Twitter](#), [Facebook](#) and [Instagram](#) and their own personalized [website](#) of **Missyou** right away.
