Cavisson Systems Sponsors World Quality Summit 2019 Hyderabad

Hyderabad, Feb 12, 2019 (Issuewire.com**)** - Cavisson Systems, a leading provider of user, system, and application performance software solutions, today announced its participation in World Quality Summit 2019, a place where QA professionals come together to know what will drive the future of testing, share their knowledge and inspire everyone. Cavisson intends to showcase their latest technologies and solutions specifically in the areas of application performance testing and monitoring.

Cavisson focuses on providing high-end technology solution and services that allow our customers to maximize revenue and profitability. "The innovation and creativity that we bring to each client opportunity are based on a combination of a top-notch technology and industry best practices. Our software products & implementation services are utilized by the world's top companies. We intend a larger audience to benefit from our and our customers' experience.", said Anil Kumar, Founder and CTO, Cavisson Systems.

"By participating and taking active roles in these events and industry alliances, we will be able to offer our insights, lessons learned, and recommendations to others in the space. Allowing us to better understand the needs and concerns of our customers, is on top of our priorities for the year. We encourage all within the industry to register for this fantastic show, and engage in collective conversations with us.", said Neeraj Jain, VP Engineering, Cavisson Systems.

About World Quality Summit

The World Quality Summit is set to create one of the largest conference of Quality Assurance(QA) professionals worldwide. The summit is held across the globe. WQS is organizing this summit at T-Hub, Hyderabad on 22nd February 2019

About Cavisson Systems Inc.

World's leading brands, including retailers, network providers, and financial institutions, rely on Cavisson product suite to enhance performance, quality, and availability of their enterprise systems and

applications. Cavisson's performance testing, monitoring, and diagnostics software help enterprises maximize uptime and optimize server response time for seamless transactions and exceptional buying experiences, by:

- Detecting and isolating issues early in the application life-cycle, and
- Alerting and diagnosing issues quickly anywhere across the enterprise.

"Our attendance at World Quality Summit underscores our dedication to help DevOps reshape their strategies and best practices to adapt to the dramatically-changing performance engineering landscape, which I term as Performance 2.0. I highly encourage you all to join us at the event," said Shashank Srivastava, Director of Global Marketing and Product Management, Cavisson Systems.
