

DMC Biotechnologies secures a place in the 2019 Global Cleantech 100

Boulder, Feb 1, 2019 (IssueWire.com) - **DMC Biotechnologies, Inc. (DMC)**, an early-stage biotechnology company, was named by Cleantech Group in the prestigious [2019 Global Cleantech 100](#).

The Global Cleantech 100 is an annual guide to the leading companies and themes in sustainable innovation. It features the private, independent, for-profit companies best positioned to solve tomorrow's clean technology challenges. This year marks the 10th edition of the list.

"DMC is honored to be recognized in the Cleantech 100 this year as we continue to advance our proven technology for the efficient and cost-effective production of multiple product families," said Matt Lipscomb, Ph.D., CEO, and Co-Founder of DMC.

DMC is building a capital-efficient, multi-product company using patent-pending technology to reduce biological complexity and enhanced the speed of development by creating an efficient, fermentation-based manufacturing platform that has the capability to produce a broad diversity of bio-based products with application in multiple markets.

The list combines Cleantech Group's research data with qualitative judgments from nominations and insight from a global 87-member expert panel comprised of leading investors and experts from corporations and industrials active in technology and innovation scouting. From pioneers and veterans to new entrants, the expert panel broadly represents the global cleantech community and results in a list with a powerful base of respect and support from many important players within the cleantech innovation ecosystem. The list is sponsored by Chubb.

"Our tenth edition is dominated by innovations for the future of food and mobility, and a decentralized and digitized future not only for energy but for the industrial world more generally," said Richard Youngman, CEO, Cleantech Group. "This is a far cry from the dominance of hardware, solar and biofuels in the inaugural Global Cleantech 100 in 2009."

[The complete list of 100 companies](#) was revealed on 28 January at the 17th annual Cleantech Forum San Francisco.
