

Dynasty Capital Management's Response To The Fcsc

KwaZulu Natal, Feb 9, 2019 (IssueWire.com) - Dynasty Capital Management would like to address the issue regarding the article which was published by IOL's Business Report on the 10th of October 2018. We at Dynasty Capital Management operate by handling investor accounts by receiving their respective login details in which they have invested their funds into an online brokerage of their choice.

We (Dynasty Capital Management) have never operated by taking investor funds into our hands as we don't act as a bank thus we are not required to be registered under the FSB/FCSA. It states in the article which was released by IOL's business report "Dynasty Capital Management was fraudulently using the documentation of Dynasty Asset Management".

This is absolutely false, Dynasty Capital Management has no association with Dynasty Asset Management whatsoever.

We would like to clarify our firm does not require to be registered under the FSCA as we don't take in investor funds into our own hands thus the article released by IOL's business report defames the reputation of our firm Dynasty Capital Management.

And we conclude by saying that our firm has not operated in an illegal manner and there isn't any legal case proving that our firm Dynasty Capital Management is performing operations in an illegal manner.

About Dynasty Capital Management

Dynastycapital.co.za is a registered company in South Africa (PTY LTD 2018/267122/07) and our private equity management firm operates by handling investor accounts for high net-worth individuals by providing weekly returns. We handle investor accounts by receiving trade logins to their (the investor's) trading accounts which in they have invested in a brokerage of their choosing.

We operate by only handling their account and we don't take in investor funds into our firm. The trading account is accessed by the investor alone and the ability to deposit and withdraw is fully controlled by the investor. We get payouts for accounts we handle on an agreed percentage and the investor is supposed to pay us out by withdrawing the particular profit percentage which has been agreed upon on

a prior date.
