

EC-Council's Top Cyber-security Certifications CHFI and CISO now approved by US Government

New York, Feb 18, 2019 ([Issuewire.com](http://www.Issuewire.com)) - With the rise in the Cyber-crime in the world of computers, the US Government has decided to be stricter with the Cybersecurity of the States. As a step towards this initiative, the Government has approved CHFI and CISO as the as Cybersecurity certification.

Computer Hacking Forensic Investigator

[CHFI -Computer Hacking Forensic Investigator \(CHFI\) v9 is a certification](#) whereby one can detect the hacking attack on one's system and extract details of the attack to report such crimes to the Cybersecurity cell. The process of investigation can also help to produce evidence acceptable in the court of law.

To put into simple terms, the certification aims mainly to prepare the student to use the breaking digital forensics technologies to conduct computer investigations.

The results of the computer investigation are analyzed the same with potential legal evidence in mind. The evidence is required in various crimes such as a misuse of the computer, theft of trade secrets, stealing and destruction of Intellectual property and Cyber frauds. The certified investigators are trained to get the data that is in the computer system even though they were deleted or encrypted.

Chief Information Security Officer (CCISO)

[EC-Council's CCISO Certification](#) Program is valid to certify information security professionals all around the world.

The Certified CISO (CCISO) program is a unique training and certification program. The aim of the program is to produce top-level information security executives. The highlight of this program is that the application is made from a management point of view. It focuses on the application of the information security management principles and also on the technical knowledge of the student.

A Chief Information Security Officer is capable of addressing and resolving the evolving threats to information security by developing and conserving a tough information security strategy. The potential upside of the program is the officer is prepared to play a vital role in creating effective and efficient processes. The officer will also lead a team of technically skilled professionals to defend the core interests of their organization.

The two Computer Hacking Forensics Investigator (C/HFI) and Certified Chief Information Security Officer (C/CISO) were recently approved and added to the Department of Defense (DoD) 8570/8140 directives. So what does this mean?

Well, as the times are changing the Department of Defense (USA) depends on its Information Assurance (IA) for protecting its vital information, information infrastructure, and system. The Department always ensures that the IA has the knowledge to complete the tasks. The Directive aims to have 100% certified workforce.

The news of the replacement of the DoD Directive 8140 by DoD Directive 8570 meant there were many governments officials who had to undergo training with respect to the new directive. The training framework in the DoD Directive 8140 manual will be based on the National Initiative for Cybersecurity Education (NICE) framework.

Well, no one will be wondering where to get the training for the new DoD Directive 8140. NetCom is set to offer exclusive/special DoD 8140 Training Options.

NetCom offers training options for Technical and Management from level 'I' to level 'III'. The certification programs are available under numerous formats. Private On-site training is available, training is available at the training centres located across the USA, as also the certification boot camps and acceleration camps are organized to speed up your certification.

[NetCom Learning](#) offers Special pricing for Government & Military clients. They support the Federal, State and Local Government Agencies by providing vendor authorized IT and Business Training and Certifications solutions. NetCom Learning will provide customized services to meet the government's specific needs.

This gives the CHIF and CCISO students to get through the Department of Defense (DOD) (USA). This will also enhance the chance of getting a better job or a promotion and an edge over the other candidates.
