Regulatory bodies across the world are compelled to form rules regarding the handling of toxic e-waste due to the increased generation of e-waste. These new standards offer a better command over the practice of e-waste processing and mobile phone recycling techniques. Research analysis on the global green and recycled mobile phone market identifies that the introduction of these stringent regulatory standards will be one of the major factors that will have a positive impact on the market's growth during the coming years. It has been made mandatory to collect the e-waste generated by manufacturers and channelize them for proper disposal and recycling. Manufacturers are compelled to maintain a proper record of the volume of e-waste generated, handled, and disposed of. Furthermore, the application of the hazardous material in electronic equipment has been restricted by the EU legislation. This, in turn, will motivate manufacturers to develop green and recycled mobile phones.

Asia is considered as one of the most common dumping ground for the generated e-waste. The growth in the middle-class population is resulting in increased e-waste in the region. Also, the purchase volume of electronics is increasing due to the rising disposable income of individuals. The generation of e-waste will further increase due to the short lifespan of these electronic devices. It has been observed that, in APAC, China generates the maximum e-waste. This drives the need for the green phone to minimize the overall environmental impact.

Market Segment by Companies, this report covers

Arrow Electronics

Ingram Micro ITAD

Redeem

SIMS RECYCLING

MobileMuster

Electronic Recyclers International

Karma Recycling

Greencyc

Mazuma Mobile

GRC Wireless

Market Segment by Type, covers

Plastic

Metals

Market Segment by Applications, can be divided into

Adults

Children

The Old

We can also provide the customized separate regional or country-level reports, for the following regions: North America, United States, Canada, Mexico, Asia-Pacific, China, India, Japan, South Korea, Australia, Indonesia, Singapore, Rest of Asia-Pacific, Europe, Germany, France, UK, Italy, Spain, Russia, Rest of Europe, Central & South America, Brazil, Argentina, Rest of South America, Middle East & Africa, Saudi Arabia, Turkey, Rest of Middle East & Africa

Table of Contents –

Global Green And Recycled Mobile Market Size, Status and Forecast 2023

- 1 Market Overview
- 2 Manufacturers Profiles
- 3 Global Green And Recycled Mobile Sales, Revenue, Market Share and Competition by Manufacturer
- 4 Global Green And Recycled Mobile Market Analysis by Regions
- 5 North America Green And Recycled Mobile by Countries
- 6 Europe Green And Recycled Mobile by Countries
- 7 Asia-Pacific Green And Recycled Mobile by Countries
- 8 South America Green And Recycled Mobile by Countries
- 9 Middle East and Africa Green And Recycled Mobile by Countries
- 10 Global Green And Recycled Mobile Market Segment by Type
- 11 Global Green And Recycled Mobile Market Segment by Application
- 12 Green And Recycled Mobile Market Forecast
- 13 Sales Channel, Distributors, Traders and Dealers
- 14 Research Findings and Conclusion
- 15 Appendix

Reasons to Buy

- Current and future of Green And Recycled Mobile Market outlook in the developed and emerging markets
- Highlights key business priorities in order to assist companies to realign their business strategies
- The segment that is expected to dominate the Green And Recycled Mobile Market
- Regions that are expected to witness the fastest growth during the forecast period
- Identify the latest developments, Green And Recycled Mobile Market shares, and strategies employed by the major market players

- Save and reduce time carrying out entry-level research by identifying the growth, size, leading players and segments in the global Green And Recycled Mobile Market
- Develop/modify business expansion plans by using substantial growth offering developed and emerging markets
