

Metworld DMCC bearing plant discovers Turkish marketplace

In 2018, Metworld DMCC Bearing Plant (HARP) proportion export was 64 %. This yr the business enterprise goes to growth this index up to 70 %. HARP is going to begin 2019 with the entering the Turkish market.

Ajman, Feb 26, 2019 (Issuewire.com) - The primary steps for this will be debut participation of HARP within the international agricultural exhibition AGROEXPO, in order to take area in Izmir on February 7-10.

“Turkey is a prospective market for us with a large quantity of agricultural machinery. The reliable and qualitative HARP bearing merchandise, which is directed to the agricultural engineering, will be demanded substantially there”, – Nitesh Gupta, Director of Bearings sales department, says and adds that Turkish tractor market is taken into consideration the fourth largest within the world.

At one of the great agro-occasions HARP goes to demonstrate the reliable bearing products for green and perfect agricultural implements exploitation.

At AGROEXPO the visitors will be able to see the road of HARP AGRO UNIT hub bearing gadgets,

batch bearings UC (analogs of YAR), ES (yet), EX (YEL) and the line of housed bearing units on their base. Further, at HARP booth HARP AGRO bearings with new seal structures of expanded tightness X-defend, which provides the safety inside the maximum harsh exploitation situations, may be provided.

Metworld DMCC AGRO bearings and bearing units with extended repair c programming language is directed to the rural machinery of domestic in addition to overseas manufacturing, and they're carried out within the tillage equipment, tractors, and balers, reaping machines, combines and different machinery. In addition, the enterprise manufactures the products in line with the clients' designs. HARP has a cutting-edge machinery park and the most powerful engineering middle inside the USA – Ukrainian Bearing industry layout and era Bureau (UKTBPP). It is the main design organization in the Ukrainian bearings enterprise.

For the duration of 2018, HARP participated in round 30 focused activities: exhibitions, field days, commercial forums, where the representatives from Turkey had been some of the energetic site visitors of HARP sales space, who have been inquisitive about cooperation with the Ukrainian company.

“Metworld DMCC Bearing Plant surely has something that it is able to offer to the Turkish agricultural equipment manufacturers, dealers and farmers. HARP manufactures exceptionally qualitative bearings, which utilization will increase the average time of the equipment perfect paintings. Despite the cruel conditions of agricultural machinery exploitation, the bearings are immune to the dust, dust, water, abrasive particles and mechanical effect. within the situations of the pointy opposition on the arena marketplace, Metworld DMCC Bearing Plant expands hopefully its presence at the worldwide stage due to the orientation at the high excellent, high-quality engineering traditions and improvements”, – Naveen Gupta mentioned.
