MPV-player became steeper than world-renowned YouTube and started up the 'screen in screen' function

Limassol, Cyprus - Magna Pars Internet Technologies LTD today announced that it has launched new release of MVP Player. After a last release, MPV Player has a function of multi-screen in the same window.

Limassol, Feb 21, 2019 (Issuewire.com**)** - Now user views from 1 to 4 video streams in the single player mode at the same time. In the previous versions, some part of a screen was hidden by edges of a browser. MPV-player creators got the idea from football experts, who often had to work behind a small screen of a laptop. They had to open several windows to watch many different events simultaneously. Due to this new feature of MPV-player users will play up various different videos at the same time on screens of their laptops or tablets.

MPV player is proprietary of Magna Pars Internet Technologies and it was designed specifically to address the common pain-points in the video marketplace. The new features allow customers to choose advertising providers to monetize any traffic, to combine multiple line items from different suppliers according to the defined conditions and also connect all ad formats in a flash. It plays back various types of contents but also high-resolution 4K, 8K and 3D videos with ultra-high-definition detail and clarity.
It also supports HTML5 all-device video player, with Integrated Paywall.

'There's more complexity than ever in the video: new platforms, new formats, new business models, and fierce competition. MPV player's flexible solutions combine best of breed content management,

playback, live streaming and more. The Professional video streaming MPV platform delivers an open solution that simplifies and streamlines video publishing. Result: less cost and complexity, more engagement, and maximum revenue. With this new feature, we will avoid family arguments. So, for instance, the wife can watch series and her husband a football game. ' claimed Karen Arshakyan, the director of Magna Pars Internet Technologies LTD.

MPVplayer is a functional online player that provides all the features of customer needs. It allows you to create an individual player for the site just in 2 clicks. It uses an unusual model of monetization. The MVP Player based on a paid rate model with different tariff plans, but the earnings tool is really engaging. The customer set up the code into their sites and run the advertising. The clients get the whole among of earnings from the advertising using MVP Player. The revenue-based on via pay-per-view model. In addition, this one supports popular video hosting services.
