

NetCom Learning introduces exclusive Private & Group training options for latest Microsoft 365

The most awaited certification for Microsoft 365 is now available with the NetCom Learning. NetCom Learning also launches exclusive Private, group and enterprise training offers for the latest Microsoft 365 Modern Desktop certifications.

Las Vegas, Feb 21, 2019 (Issuewire.com) - The all-new M365 certification will provide one with in-depth knowledge about the Modern Desktop Admin (Associate), Teamwork Admin (Associate), and Messaging Admin (Associate).

Modern Desktop Admin (Associate) – The job of the modern-day Desktop administrator includes configure, deploy, manage and monitor devices, secure the system and also handle client's applications. The associate has to configure a language pack, has to clearly install all application including client's application, select the apt windows edition, in case of migrating from another system then help the user with the same. All this has to be done in an enterprise environment.

Not only this, but the association also has to install MS Edge, mobility settings, sign in options handle

the troubleshooting etc.

The associate is taught to manage devices in directories, local groups, local users and Windows security. To configure data access and protection, NTFS permissions, shared permissions, user account control (UAC), Windows Defender Firewall devices by using local policies and local registry. They are taught how to implement local policy and encryption.

In case of networking and connectivity, the Configure networking the desktop administrator is expected to know how to configure client IP settings, mobile networking, VPN client, Wi-Fi profiles, remote connectivity and remote management.

For this certification a student is required to do certification of Exam 70-698: Configuring Windows 10 (retiring March 31, 2019), you only need to take MD-101 to earn this new certification.

Teamwork Admin (Associate)

Microsoft 365 Teamwork Administrators configure, deploy, and manage Office 365 workloads that focus on efficient and effective collaboration, such as SharePoint (online, on-premises, and hybrid), OneDrive, and Teams.

For this certification, a student is required to do certification of MS 300, 301 and 302. Or the students who have passed Exam 70-339 have to give a transition exam.

Messaging Admin (Associate)

Microsoft 365 Messaging Administrators configure, manage, and monitor messaging infrastructure, permissions, client access, mail protection, and mail flow in on-premises, hybrid, and cloud enterprise environments.

The certification will teach the associate to manage databases, Manage Database Availability Groups (DAGs), manage and implement client access, Manage disaster recovery and manage messaging infrastructure lifecycle.

The associate would have the roles and responsibilities to plan the Transport Pipeline, Manage Connectors, recipient resources, mobile devices and Mail Flow. Associate will have to troubleshoot mail flow problems like validate inbound and outbound mail flow.

Planning a hybrid environment and implementation of the migration is also done by the associate. The certification will help to deploy a hybrid environment, manage public folders, manage role-based permissions, manage message hygiene and manage Advanced Threat Protection (ATP) for messaging.

The certification provides the students with the following skills and knowledge like Configure and manage SharePoint Online, Configure and manage OneDrive for Business, Configure and manage Teams, configure and manage workload integrations, configure and manage SharePoint On-Premises, configure and manage hybrid scenarios and migrate to SharePoint Online.

For this certification, a student is required to do certification of MS 200, 201 and 202. Or the students who have passed Exam 70-345 have to give a transition exam.

Attractive jobs

IT professionals who earn Microsoft certification often receive extra recognition from hiring and supervising managers and enjoy improved on-the-job success and promotion opportunities.

A Microsoft Mobility certification is designed for those who deploy, configure and/or manage a Windows desktop environment and related devices, whether on-premises or in the cloud. IT professionals with this type of certification usually fill positions such as help desk technicians, support personnel and systems administrators, to name a few.
