

NJ Company Provides Free Tank Search Using GPR With Every Environmental Phase I Assessment !

A Environmental Phase I is limited in nature. Ground Penetrating Radar can Identify buried oil tanks and possible contaminated areas.

Point Pleasant, Feb 1, 2019 (IssueWire.com) - When purchasing an industrial or commercial piece of property, proper "Due Diligence" is necessary to prevent buying a contaminated site. An Environmental Phase I Assessment may not satisfy all of the buyers "Due Diligence" requirement under the New Jersey "Innocent Purchaser" laws. Ground Penetrating Radar can identify buried oil & gas tanks, construction Debris, metal and plastic pipes, roofing shingles and abandoned septic systems. In some cases, Ground Penetrating Radar (GPR) anomalies can identify areas where further probing may be required to identify the source of the anomalies. Environmental Systems has over 20 years experience performing Environmental Phase I and Phase II Assessments. Our dedicated staff of Environmental Scientists and Experts can characterize any industrial or commercial property. It is not unusual to find newly constructed shopping centers built over contaminated land which housed 'Dry Cleaners and have Chlorinated Solvent Contamination. Identification of contaminated sites prior to purchase may save the potential buyer over \$100,000 in possible remediation costs as if a Buyer purchases this property he may be required to perform the "Clean-Up"

The free ground Penetrating Radar scan is good for properties less than 1 acre. Properties larger than 1 acre will be accessed a higher fee. To obtain additional information contact Environmental Systems at 732-892-8707 or visit our website at www.allenvirossystem.com.
