

Raybiztech published Healthcare template for Kentico marketplace

Responsive Template For Healthcare

by Ray Business Technologies Pvt Ltd

Summary

This is a Responsive Template for Kentico CMS – Ideal for Health care centers, Hospitals, Medical Collages, chemistry labs, Forensic labs etc.

Description

The Kentico Responsive Website Template for Health care centers is a combination of trendy minimalism style and multicolor elements built on Bootstrap Responsive Framework; a good way to claim about the balance of originality and pragmatism of your Health care centers. Photos related to Healthcare just make the visual side of the template more attractive. Also the responsive layouts would increase coziness of viewing on handheld devices.

Note: Hotfix 7.0.34 or higher is necessary for the template import in Kentico 7.

Hyderabad, Feb 7, 2019 (IssueWire.com) - Raybiztech has added template for the Kentico Healthcare professionals, that helps leverage rich content and deliver crucial benefits. The template has been instrumental in transforming the online presence of hospitals and medical facilities along with offering a channel for powerful promotional and marketing campaigns. This template is well-integrated into the Kentico marketplace for seamless and scalable performance with the medical facility's third-party or legacy systems.

Several renowned healthcare platforms are increasingly embracing digital transformation with an aim to boost their outreach, improve customer satisfaction levels, and offer a quality healthcare service through digital media and platforms. A dedicated portal for healthcare domain built around the Kentico platform will boost overall marketing efforts and drive sales. It will boost the overall presence of the website and track visitor metrics along with bounce rate and respective conversion rates.

The addition of template will enable real-time intimation for end-users on modes of treatment and the costs of individual facilities. With the more holistic view of the marketplace, healthcare professionals can now pursue targeted marketing aimed at a greater level of customer engagement and overall customer satisfaction.
