The main role of a registered nurse is to provide nursing care and treatments to patients suffering from

various medical conditions. While their primary responsibilities will involve caring for patients, their specific job duties will vary depending on your employer and specialization. While a majority of registered nurses work at hospitals they are not limited to that setting, they can also work in clinics, schools assisted living facilities, homes, schools and more. They must also stay up-to-date with new tools and technology to help provide the best care to patients and families, and the best support to doctors and other healthcare professionals. Registered nurses must possess excellent communication, emotional intelligence, teamwork, problem-solving and critical-thinking skills.

When not working, EIDonna enjoys spending time with her family and grandchildren either at the farm or at the lake or in the mountains. She also loves knitting and crocheting as well as making cards/scrapbooking.
