

Savio Plus Enters 2019 with a Bang: New Offers, New Design, and Buzz

Dubai, Feb 18, 2019 (IssueWire.com) - From the recent few years, the Middle East is constantly growing and accepting the e-commerce sites for buying and selling the products online. People are shifting their focus towards e-commerce stores to avail the services right from their level of comfort. With the massive enhancement in the digital world & the combination of technology and internet boost the accessibility of people to discover the desired services from the device.

Among the increasing network of an e-commerce site, the UAE also welcoming the coupon industry equally to make the shopper's interaction better with the shopping stores. The finest example of the coupon store is Savioplus that make possible for the people to experience a budgetary shopping with top rated stores. Savioplus had begun its journey a few months before in the UAE and now arising as the best coupon website store among the shoppers.

Finest UI & Accessibility

Better User Interface & the accessibility of the site is a primary goal of the team, as the advancement in the technology and adoption of smartphones lay down the market of the desktop & laptops. People prefer to access everything from their mobile handset by avoiding the big laptops. Savioplus have the mobile-friendly interface that serves the excellent experience to the users on a visit. With the navigation bar and search box, the buyers easily check out the desired e-commerce store with the compatible and most responsive configuration.

From the recent analysis, 83% of the visitor landed on Savioplus via mobile device and rest are the tablet & desktop users. Therefore, the company is continuously updating the features and accessibility of the site.

Categories & Special Offers Section

Everything is well managed and organized for the ease of the shoppers; diverse sections are created for the quick search of the desired result. Users can directly scout the categories section from the navigation bar to browse the desired e-commerce store coupons & deals. For example at Savioplus, four major categories are there like travel, electronics, food & grocery, and fashion. Each category has a bunch of the respective online stores with fresh offers and promo codes.

For shopaholic people, there is a special offer section beside all categories where the ongoing and special offers of the top rated stores are available. The user can discover the exciting e-commerce stores deals like [noon promo code](#), awok coupon, zomato offers, tajawal flight booking codes, ajmal perfumes offer, etc. with the best design and availability of e-stores, the Savioplus is supporting the merchants to double their revenue.

Top-Rated & Performing Stores in the Bucket

By providing the genuine online platform to the buyers in Dubai the Savioplus enriching the experience of the people by serving the fresh deals every day at their store. They have the collection of top rated & performing stores in the bucket that are performing amazingly like Sephora, Wadi, Noon, Travel store like Qatar, Emirates, fashion store like Elabelz, Namshi, are the best-rated stores in Dubai and Saudi

Arab.

People in UAE have adopted the e-commerce market and it's reaching to everyone rapidly with the reliable store and verified discounts with [souq daily coupons](#), namshi deals, etc.

Savioplus Upgraded to New Design

The team has shared further that, the Savioplus website is rolled up with the latest design and features to offer a new version to its users. The updated version of the website is worked smoothly with 10 times faster access, the coupons & offers are easily searchable, the layout and the colour combination is much improved make browsing faster than before.

Now the visitors can directly look for the offer by using the search box and receive the respective store identical to the searched keyword. The attractive banners on the homepage and pop-up discount coupon direct the users to grab the deal instantly. The website is operated in almost all screen resolutions like mobile, tablets, laptop, etc.
