One of the most lucrative and highest yielding areas of stock investing is the ability to locate quality companies in the small cap stock market. The difficulty with investing in this space is the companies often lack stability and market dominance to make some investors comfortable. On this episode, we talk to a leading expert and former hedge fund manager that has invested in the small business space over three decades. Positive Phil currently runs his own blog where he provides a detailed analysis of all the conference calls and small cap companies he follows (a couple hundred businesses).
