Email Analytics

Complete report on opened, clicked and bounced mails. By Knowing who has opened your mail you can retarget them as they are really interested in your product / service.

Unlimited Lists & Subscribers

Irrespective of the plans you choose you will have no restriction on the number of lists, number of subscribers and number of campaigns.

Complete Control

We provide the platform as a service in your hands. You have complete control on creating lists, adding subscribers and sending campaigns.

Chennai, Feb 6, 2019 (Issuewire.com) - Spidergems has launched Mail Igniter, an entirely new bulk email program designed for small businesses that look for a simple, reliable and affordable bulk emailing tool.

All packages provide unlimited lists, unlimited subscribers and campaign statistics which make it more attractive for small and medium-sized businesses.

Mr. Venkat, the founder, and CEO of Spidergems, revealed that “we know what it is required for a good bulk email program since we are the top [bulk email service provider in Chennai](#). We designed the program to get make running campaigns easier and more efficient.”

Mail Igniter combines the power of web and cloud technologies to ensure minimal downtime. With the simple and intuitive user-interface, reliability and rich features, Mail Igniter is one of the best bulk email marketing solution in the world. The platform is built on the latest web standards to ensure optimum performance and reliability.

The program enables businesses to blast personalized emails to a large audience.

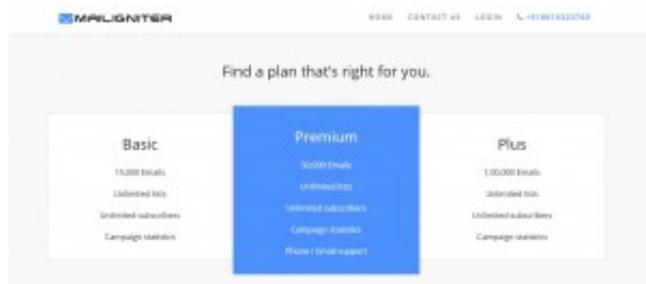

It has hundreds of email templates suitable for all kinds of email letter. It also allows users to create or upload custom HTML email templates if they want.

The campaign statistics provides real-time information about how many receivers opened, bounced or clicked on the email.

Mail Igniter also features A/B testing to allow the users to find what techniques works and what doesn't

work for them.

Mail Igniter is the major web application product from Spidergems after the hospital management system that was released last year. It was a huge hit and it's already been used in many reputed hospitals across the world.
