

Suarez Corporation Industries (SCI) has exited bankruptcy

North Canton, Feb 26, 2019 (IssueWire.com) - Suarez Corporation Industries (SCI) has exited bankruptcy.

SCI suffered severe financial harm due to the false and malicious prosecution by the Obama administration against SCI and its CEO Benjamin Suarez.

SCI and Suarez were acquitted of all 19 election law charges in a trial in July 2014. Suarez was convicted of a minor process charge due to witness intimidation by the D.O.J.

Suarez has had a team of attorneys and former FBI agents conduct a criminal investigation of the false prosecution over the past 2 years which found substantial evidence of crimes.

Suarez will soon file formal criminal charges in Stark County court against Ohio U.S. Senator Sherrod Brown, former Cleveland U.S. Attorney Steve Dettelbach, his assistant U.S. Attorney Carole Rendon and a number of other D.O.J. officials.

SCI and Suarez were one of many victims of the corrupt Obama D.O.J. who used Soviet-style tactics to punish political opponents. President Donald Trump has also been a victim as now revealed in the Russian hoax scandal.

Before the false prosecutions, which started in 2011, SCI had recorded sales of over \$400 million a year and was on the way to becoming a billion dollar plus sales a year company, which would have created thousands of new jobs in Stark County. SCI is now ready to resume this growth and new jobs.

SCI's EdenPURE® division has developed many new and innovative products and will soon go public.

SCI's United Cloud™ division has developed new, revolutionary online services that will soon launch.

SCI's GenesisBODY™ division has concluded a 20-year research and development project that has produced advanced exercises and an advanced exercise machine, which scientific studies prove can cut health care costs by at least 50%. This will also launch soon.
