

Sunbridge Software Services achieves Microsoft Silver Competency for Enterprise Resource Planning

Microsoft® Partner

Silver Enterprise Resource Planning

Pune, Feb 26, 2019 ([IssueWire.com](http://www.IssueWire.com)) - Sunbridge Software Services Pvt Ltd achieves Microsoft Silver Competency for Enterprise Resource Planning.

Sunbridge Software Services announced that it has enhanced its ERP services capability by becoming a Microsoft Partner Network member with Silver Enterprise Resource Planning Competency. This will give Sunbridge greater access to Microsoft tools, technologies and training that will, in turn, benefit its customers in their business application journey.

Sunbridge has a growing team of certified personnel working on various Microsoft platforms. By signing up with the Microsoft Partner Network, the company is supposedly taking this relationship to its rational extension.

This will supposedly not only help [Sunbridge Software](#) gain a deeper understanding of the business goals of its customers but also assist them along the way in technology selection, tool advisory, data migration, system continuity and a centre of excellence establishment, thereby laying the foundation for sustainable success.

Sunbridge Software aims to have the required infrastructure, a strong team, cross-domain experience, analytical capabilities, and expertise in holistic solution development to be able to leverage this partnership.

The company has 50+ Microsoft-ready members in-house and can immediately deliver on the [Microsoft Dynamics 365](#) range of product like Finance and Operation, Business Central, Sales, Field service and Power BI.

Sunbridge Software CEO Mangesh Divekar says, "We believe that the Microsoft Silver Competency for Enterprise Resource Planning is a step forward in increasing our ability to delight our customers with a wider range of consulting capabilities and support choices."

Microsoft's Mr. Rakesh Panda added, "By achieving the Silver Competency for Enterprise resource planning, Sunbridge Software has proven its commitment and expertise in specific technology areas, which places them among a small percentage of Microsoft partners worldwide.

"For customers looking for a partner to help meet their unique business needs, choosing a company like Sunbridge, that has attained Microsoft competencies is a smart move. They have highly qualified experts with access to Microsoft technical support and product teams."

Sunbridge has successfully implemented [Dynamics 365](#) solutions on both on-premises & Azure platforms. It recently helped a customer ingest data from various data sources to improve visibility, accessibility and provide business insights of its sales performance globally.
