Tech Enabled Concept to Completion Solution

Easy Home

Bengaluru, Feb 11, 2019 (Issuewire.com**)** - Easy Home was started with the belief that owning a home must be a joyous experience for homeowners. Standing with a firm belief that great design can only be executed when the Home Architect is at the core of the journey from concept to completion. To enable this, a team of in-house architects as well as renowned design partners from across the globe collaborate to effectively conceptualize, manage, and deliver your dream home using the technology platform.

With an ethos of Design and Technology at the heart of everything, Easy Home strives to bring ease and transparency to homeowners.

Providers of end-to-end home planning, designing, building and project management tools to the homeowner with the power to be connected to the work on site completely mobile. Easy Home is a design and technology-first startup and employs a combination of data science, algorithms, and design to create unique experiences for homeowners. With over 50+ happy customers and trusted design partners across India, Easy Home is India's first service to give the homeowner complete integrated services with absolute transparent systems.

Founded in 2017 by two young enthusiasts; Mr. Raja Arjun and Mr. Karthik Raju. Raja Arjun is a fourth generation entrepreneur with over a decade in the reality, design and build sector, delivering projects worth a cumulative value of over Rs.6,000 crores (Apx.1 Billion $) for his clients. Karthik Raju is an entrepreneur and an MBA from Babson College, Boston, USA. His experience in Technology Consulting and Real Estate has enabled him to bring a fresh perspective in the development of the technology platform that enables to execute tasteful designs for the clients.

Improved project outcomes can only occur through understanding the most significant of the problems in the construction space which are the lack of Transparency, Communication, and Collaboration.

Innovation in technology has been the core of project management at Easy Home. The technology platform 'E Home' is the first of its kind that enables homeowners to communicate, collaborate and track their projects from concept to completion. Constantly evolving and striving to bring more power into the hands of the homeowner which is a theme underlying all of the above technologies in the impending connection of many construction activities that are currently siloed.
