

The Growth of VoIP Technology & VoIP Industry beyond 2020

VoIP Technology is growing faster and it is one of the most innovative technology of 21st century.

New Delhi, Feb 14, 2019 (Issuewire.com) - VoIP Technology is growing faster and it is one of the most innovative technologies of the 21st century. The team at Evoipstore understands this and is determined to become the best marketplace in India for VoIP products (Hardware & Software).

VoIP is a combination of traditional telephony and modern internet which makes it Voice Over Internet Protocol. The industry is growing rapidly all over the world and is one of the most profitable sectors to invest in today's world. Researchers estimate it to reach \$140 billion USD by 2021 in US, China, Europe, Japan, Southeast Asia & India. The major factors responsible for the growth of the VoIP industry are- less infrastructure compared to traditional telephony & fresh market for new companies.

Evoipstore not only has all branded Telephony products under one roof but also has product experts and solution-specific advisors to empower the consumers with best in industry service. Consultation and Training facility on the site makes it unique and helps the visitor to explore their business needs not in standard but in a customized manner.

In a recent event organized by Evoipstore we had a quick conversation with Mr. Abhishek Baid- Director of Evoipstore, over the growth of VoIP industry in India and how their team is looking forward to meeting the rising demand of VoIP Technology. He said, "We know that the demand for VoIP products is increasing in India as businesses are switching from traditional telephony system to VoIP. Our team is continuously striving to cover the market and provide world-class VoIP products to our customers along with best customer service". He also added that an increase in demand has also raised the competition but Evoipstore believes in providing best in class products & customer service which makes us stand strong in the market.
