

Who is the best Interior Designers in Bangalore ?

Provide end to end services in Interior Designing like living Spaces, Bedroom, Corporate spaces, Modular Kitchen, kids bedroom etc.

Bengaluru, Feb 12, 2019 ([Issuewire.com](http://www.issuewire.com)) - ADDON Interiors has a belief in giving low-cost interior designing solutions for our clients. Consider us as a low-cost airline. The aim of flying in a plane is to reach from place A to place B. For most of us, that is the thing that we need with interiors. What we need are closets, wardrobes, kitchen cupboards which are durable at a reasonable price.

How we do this is very simple. In our view and experience, we have understood that wardrobes and kitchen cabinets are typically the equivalents since the capacities are the same. What changes are outer colour and completion? Hence, we have designed and optimized our designs in such a way so that material wastage, as well as the time taken for work, is minimized. Since these two are the primary expenses for interiors, the overall expense is about what you will get for similar wardrobes from an e-commerce business website.

For the designs and plans for interiors, we have a better range and scope of internal designs to choose from. We additionally have a wide range of laminates and carpet designs which are not available anywhere else.

All these come without compromising on the quality of the material. We don't use cheap quality of material or particle board for frames or shutters regardless of whether the work is done in a factory. All the plywood which goes into your project is ISI grade. Moreover, you will get a detailed report of the material that will be utilized which we approve.

Our work happens in broadly 4 steps.

Step 1: Requirement Gathering

Once you finalized the work with us by paying a small amount in advance, then we will schedule a visit to your place to gather all the requirements. We would like to say that apart from the woodwork, we also handle false ceiling work, electrical work, civil. Not to mention, electrical fittings, bathroom and kitchen accessories, curtains and rods and even movable furniture. During the visit, we take the measurements, finalize the designs and layouts for the various things, discuss the other things within our scope and finalize the finish selections. Please keep at least half a day for this from your end. Additional visits are charged.

Step 2: Quote and payment

Once everything has been finalized, you will get a detailed quote based on the things which you included. You will also get payment details, as well as the schedule of payment and approximate timeline for the work, post payment. No changes can be entertained after this process.

Step 3: Execution

Firstly we will give you a brief idea of the designs and work will start. You will also get a material audit report as well as a mid-project update as the work continues. Once things are ready to be installed, you will also get a work status report with photos.

Step 4: Installation & Handover

Final installation of all material and handover happens once the final payment is done. You will also get a detailed invoice with details of all material purchased. This along with warranty cards (if any) will work as adequate proof or purchase in case you need to contact any other brands in case of faults.
