

Autumn. A twist of nature and technology by Decor Fan Singapore

DECOR FAN SINGAPORE exhibit makes full use of your senses to make you feel like you're in Autumn.

Singapore, Mar 8, 2019 (Issuewire.com) - DECOR FAN SINGAPORE X FRACTION exhibit makes full use of your senses to make you feel like you're in Autumn, in Singapore.

Autumn, a collaboration between Decor Fan Singapore and Fraction Design Studio, is part of SingaPlural 2019 event with the theme, Unnatural Phenomena. Taking place at the National Design Centre from 4th to 17th March, the theme explores novel designs that sought to challenge boundaries with unconventional collaborations.

Autumn

Greatly inspired by the fall season, a cool and crisp autumn morning awaits visitors as they step into the exhibit. Utilising your senses, feel the breeze tickling your hair as the fan picks up speed, hear brown leaves swirling in the wind as you pick up notes of maple leaves and see the sunlight filtering through the golden brown leaves with the Virtual Reality (VR) goggles.

Measuring 3-metre by 3-metre, Autumn is a minute long experiential exhibit, which allows visitors to

experience Autumn foliage without leaving Singapore.

The exhibit will be decked out with amber brown shades of pinwheels tuned to colours of maple leaves of the forest.

Visitors have handled virtual reality goggles before stepping into the exhibit. They are then instructed to do a 360-degree turn as they lift their hands and brush against the pinwheels which gives off a feeling alike to the rustling of leaves.

At the same time, a waft of maple, the cinnamon scent will then be diffused into the air while a gentle to strong breeze is created with the use of Decor Fan Singapore's latest smart ceiling fan.

To create the setting of an Autumn breeze, Decor Fan Singapore will be using its latest trend of custom modular ceiling fan series that allows you to customise your fan design and size based on your preference.

The new series boasts long-lasting durability, with the use of advanced hydrographic composite weather-resistant materials, and a smart intuitive energy efficient DC motor that exemplifies its performance with a smart control system.

A photo taking contest will be held where visitors can snap a photo of themselves with the exhibit and upload it with a quote that best describes their experience. Follow and like Decor Fan Singapore's social media pages and use the hashtag #decorfansingapore and #autumn_decorfansingapore to stand to win attractive prizes.
