The development in India's healthcare sector is driven by a growing population, increasing incomes, changing the way of life, easy access to great quality healthcare facilities, and intense awareness of individual health and hygiene. The private sector is the driving force behind the rise in the Indian healthcare sector expenses on private hospitals accounts for 66.9% of total healthcare spending in India, among the highest in the world. Most of the healthcare resources in India are with the private

sector, which includes 49% of beds, 26% of nurses, 80% of doctors, 78% of ambulatory services, and 60% of in-patient care. The organization helps individuals to stay within their own home to receive reliable and flexible customized care and support. Our patients' care packages are tailored to meet the individual's needs. Completecuresolutions is a home health care provider that involves doctor appointments, remote monitoring services, laboratory checkups, pharmacy services, home health services, medical equipment supplies, telephonic health enquiry, and ambulatory support. The platform offers caring and soothing care to ailing patients in Delhi NCR. Their professional [physiotherapist in Rohini](#) offers several physiotherapy services and cures in neurological, pediatric, orthopaedic, sports injury, and geriatric and postoperative physiotherapy.

With a growing population of the middle class and great usage of mobile broadband and the internet, there is a great demand for quality and inexpensive home healthcare in India. The government plan to raise the health care spending to 2.5% of the national GDP by the end of its 12th five-year plan, and to 3 % by 2022. Most of this will be done through private-public partnerships and using technology to increase different aspects of home healthcare services in India. While most healthcare startups in India are still in their early stage, there are larger tendency arising in preventive health care, pathology, analytics, emergency services, home health care services among many other things. We help patients establish a dialogue with a network of doctors, in case of any medical emergency. We tie up with doctors across different specializations to resolve patients' complication..
