

CoreIMS SaaS solution by CorePartners

CoreIMS ART is Intelligent Warehouse Inventory Management Solution built on open, intuitive and connected platform that embraces digital edge technologies such as software-as-a-service (SaaS), Business Intelligence and Artificial Intelligence

Frederick, Mar 13, 2019 (Issuewire.com) - CorePartners today announced a next-generation solution in Core products line enhancements. CoreIMS ART is Intelligent Warehouse Inventory Management Solution built on the open, intuitive and connected platform that embraces digital edge technologies such as software-as-a-service (SaaS), Business Intelligence (BI) and Artificial Intelligence (AI). CoreIMS ART offers a smart way to predict and shape demand, fulfill orders faster and deliver seamless customer experiences with extra security layer.

CoreIMS ART turns your real-time data into fast, profitable business decisions by connecting company management, warehouses, distribution centers, or manufacturing into a digital network matching everchanging customers demands at every point of the supply chain. CoreIMS ART uses most advanced technologies such as Microsoft BI and ML/AI data to power a supply chain network yielding greater customer insights, delivering better service, and driving your competitive differentiation and revenue growth.

With CoreIMS ART, CPI brings to market new SaaS application across the supply chain, inventory planning, execution and delivery areas:

- **CoreIMS:** real-time visibility across the extended supply chain, enabling cognitive insights across planning and execution, collaboration across multiple enterprises, combined with machine learning based prescriptive issue resolution.
- **CoreIMS Integration:** Integrates with handheld Barcode/RFID Scanners for accurate and time-saving warehouse operations as well as conveyor belts solution from various vendors. Integration with QB as well as Sage 50 US/CAN and Sage 100 provides a single seamless and transparent process for the whole organization.
- **CoreIMS Predictive:** highly accurate forecasts leveraging AI/ML that leap beyond traditional forecasting algorithms while also including additional demand seasonal or PR campaign influencers.
- **CoreIMS IoT Productivity:** cooperation with PTC adds IoT-enabled collaborative production planning and scheduling that leverages visibility and alerts, as well as prescriptive analytics while respecting real-time constraints.
- **CoreIMS API:** Uses external sources to proactively identify and resolve supply issues through integration with any and all required supply chain information sources. Leverages real-time integration to external influences to remediate supply risk and achieve higher service levels.
- **CoreIMS Mobile:** increase worker's productivity through iOS/Android applications suitable for mobile devices/scanners.
