- BCHUSD

 **DRIVE Markets**

**Vancouver, Mar 8, 2019 ([Issuewire.com](http://Issuewire.com))** - DRIVE Markets announced the addition of Canadian Dollars to the exchange, allowing traders to fund accounts in CAD. The exchange recently announced the launch of its institutional crypto and fiat currency exchange, offering derivatives trading for Bitcoin, Litecoin, Bitcoin Cash, Ripple, and Ethereum.

“While our operations and community touch many markets, Canada is close to our hearts,” said Peter

Coffey, Head of Sales at DRIVE Markets. “Canada is a hotbed for blockchain innovation and home to a thriving, cryptocurrency trading community. We’re here to service that demand.”

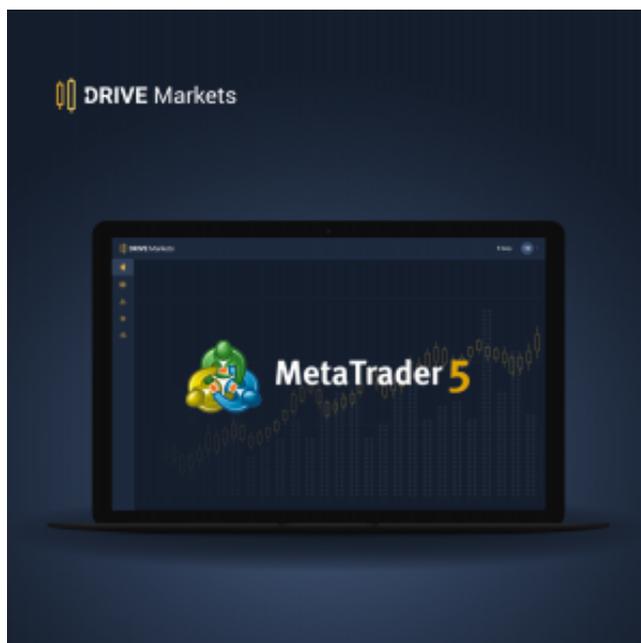

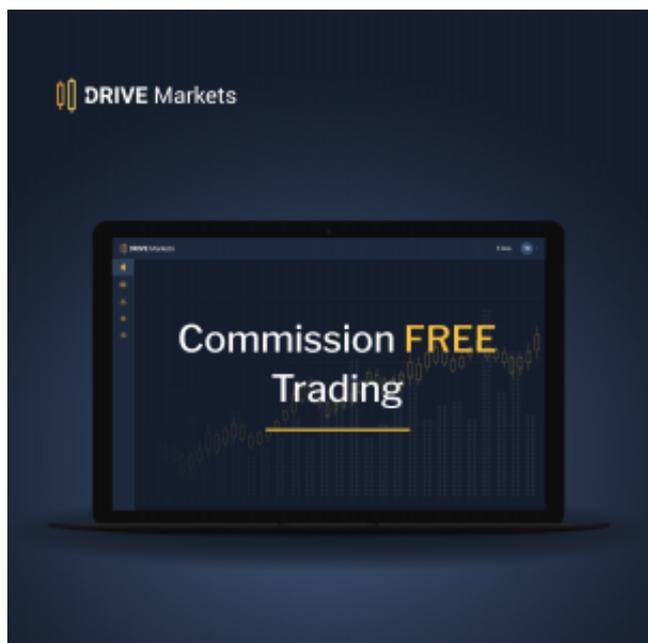

DRIVE Markets brings a connectivity first approach to cryptocurrency trading, a model familiar to the global financial markets. “By connecting to DRIVE, our clients access pro grade, high-frequency trading which is something that Bay Street is familiar with but was missing for the cryptocurrency,” adds Coffey.

#### About DRIVE Markets

DRIVE Markets is guided by two principles for digital asset trading: provide infrastructure compatible with the global financial markets and list the products that our clients want to trade. For more information, visit <https://drivemarkets.com> and follow @DRIVEmarkets on Twitter and Telegram. For the latest industry insights and news, checkout <https://driveinsider.com>.
